*Amateur Soldiers, Global Wars* Michael C. Fowler, 2005-09-30 Transnational politics modern communications and access to the tools of warfare have combined to give political movements the ability to wage global war

to promote their own agendas a development that has changed the face of both politics and warfare Fowler examines current aspects of conducting war including mobilization funding training fighting and intelligence to demonstrate how they are accessible to anyone and are well suited to waging insurgency efforts in many places around the world Such efforts force governments to deal with unforeseen enemies who violently advance their agendas in a quest for increased power and authority Because global insurgents such as al Qaeda build more direct connections between politics and the use of force confronting them requires solutions that emphasize politics as much as the use of force National governments must unite to seek cooperative solutions to issues that affect them The implications of the adoption of such strategies by groups with varied agendas will undoubtedly change foreign policy planning for decades to come
