Crane-Godreau, Eileen Mcneely, Christopher Scheibler, 2023-11-20 Aviation plays vital roles in commerce defense science and leisure travel Irrespective of the purpose of flight crew and passengers are challenged by exposure to a variety of environmental conditions that can differ widely from work and travel environments on the surface of the Earth With anticipated changes in aviation and space technology new challenges to health and safety of crew and passengers can be expected In this Research Topic we welcome contributions from those whose work and interests are relevant to the health and safety of crew and passengers This includes but is not limited to health and safety professionals FAA examiners corporate medical officers aerospace and

Primary Wood Processing John C.F. Walker, 2006-09-13 Samuel Johnson of Boswell fame said about writing whatever is written without effort is in general read without pleasure and the unexamined word is not worth reading However even the most thoughtfully written text is unlikely to be described as a good read This book is not an exhaustive review Rather it is an uneven selection of examples whose interplay across disciplines hopefully illuminates what drives the practice of forest production wood processing and consumer preferences The choice of material is arbitrary reflecting personal biases It is a summary of material presented to students at the NZ School of Forestry at the University of Canterbury This book takes liberties with other peoples ideas weaving them into fresh themes that are at best a work in progress The philosopher Francis Bacon argued that science is a debate in progress not a body of knowledge and also truth emerges more readily from error than confusion We have taken the position that it is preferable to venture a reasoned opinion and be proved wrong than

to waffle so don't swallow every sentence doubt everything The reader's task is to unravel the conceits of generalizing and the risks of particularizing
