

Calorimetry Lab Report

Lab Members: Dylan Craig, and Brayden

Objective: The objective of this lab is to find out if a fishing weight was actually made of lead, to investigate the first law of thermodynamics and Calorimetry, and to design an experiment by first creating an analytical model as a guide.

Introduction: By combining the first law of thermodynamics with Calorimetry, one can determine if a fishing weight that claims to be lead, is actually made of lead or not. The first law of thermodynamics states that you can change the internal energy of a system by doing work or applying heat to a system.

$$\Delta E_{\text{int}} = W_{\text{ext}} + Q$$

This can help determine the heat capacity of the lead weight. The heat [Q] is a physical quantity that characterizes the transfer of energy in the form of heat from an environment to a system (pg. 1, Calorimetry).

$$Q = mc \Delta T$$

It is important to note that when one is analyzing two objects that are exchanging heat, the conservation of energy is:

$$Q_{\text{hot to cold}} + Q_{\text{cold to hot}} = 0$$

Experimental Setup:

Equipment Used:

- Calorimeter
- Water
- Thermometer
- Fishing Weight
- Scale

Laboratory Manual for Principles of General Chemistry J. A. Beran, Mark Lassiter, 2022-08-16 Laboratory Manual for Principles of General Chemistry 11th Edition covers two semesters of a general chemistry laboratory program The material focuses on the lab experiences that reinforce the concepts that not all experimental conclusions are the same and depend on identifying an appropriate experimental procedure selecting the proper apparatus employing the proper techniques systematically analyzing and interpreting the data and minimizing inherent variables As a result of good data a scientific and analytical conclusion is made which may or may not be right but is certainly consistent with the data Experiments write textbooks textbooks don't write experiments A student's scientific literacy grows when experiences and observations associated with the scientific method are encountered Further experimentation provides additional cause effect observations leading to an even better understanding of the experiment The 11th edition's experiments are informative and challenging while offering a solid foundation for technique safety and experimental procedure The reporting and analysis of the data and the pre and post lab questions focus on the intuitiveness of the experiment The experiments may accompany any general chemistry textbook and are compiled at the beginning of each curricular unit An Additional Notes column is included in each experiment's Report Sheet to provide a space for recording observations and data during the experiment Continued emphasis on handling data is supported by the Data Analysis section **NASA Scientific and Technical Reports** United States.
