Non-self-adjoint Schrödinger Operator with a Periodic Potential Oktay Veliev, 2021-06-19 This book gives a complete spectral analysis of the non self adjoint Schrödinger operator with a periodic complex valued potential Building from the investigation of the spectrum and spectral singularities and construction of the spectral expansion for the non self adjoint Schrödinger operator the book features a complete spectral analysis of the Mathieu Schrödinger operator and the Schrödinger operator with a parity time PT symmetric periodic optical potential There currently exists no general spectral theorem for non self adjoint operators the approaches in this book thus open up new possibilities for spectral analysis of some of the most important operators used in non Hermitian quantum mechanics and optics Featuring detailed proofs and a comprehensive treatment of the subject matter the book is ideally suited for graduate students at the intersection of physics and mathematics

Social Security as a Human Right Eibe H. Riedel, 2006-11-07 Article 9 of the International Covenant on Economic Social and Cultural Rights on the right to social security is the shortest article in the entire Covenant and for that reason alone highly abstract and vague A comprehensive analysis of the article 9 is still lacking not least because it is widely regarded as a Pandora's box better not to be opened Experience has shown that the quality of the state reporting procedure is greatly improved once the Committee on Economic Social and Cultural Rights has adopted a General Comment Thus it seems very desirable to close this gap For the reason an International Expert Workshop on the Right to Social Security was held in April 2005 at the German Institute for Human Rights whose purpose was to highlight specific issues of the right to social security which should be addressed by the Committee when drafting a General Comment on article 9 The results of this workshop are published in this volume providing an insight into the current challenges on social security as a human right

Abstractions of Evidence in the Study of Manuscripts and Early Printed Books Joseph A. Dane, 2016-12-05 In this book Joseph Dane critiques the use of material evidence in studies of manuscript and printed books by delving into accepted notions about the study of print culture He questions the institutional and ideological presuppositions that govern medieval studies descriptive bibliography and library science Dane begins by asking what is the relation between material evidence and the abstract statements made about the evidence ultimately he asks how evidence is to be defined The goal of this book is to show that evidence from texts and written objects often becomes twisted to support pre-existing arguments and that generations of bibliographers have created narratives of authorship printing reading and editing that reflect romantic notions of identity growth and development The first part of the book is dedicated to medieval texts and authorship materials include Everyman Chaucer's Legend of Good Women the Anglo Norman Le Seint Resurrection and Adam de la Helle's Le Jeu de Robin et Marion The second half of the book is concerned with abstract notions about books and scholarly definitions about what a book actually is chapters include studies of basic bibliographical concepts Ideal Copy and the application of such a notion in early editions of Chaucer the combination of manuscript and printing in the books of Colard Mansion and finally

examples of the organization of books by an early nineteenth century book collector Leander Van Ess This study is an important contribution to debates about the nature of bibliography and the critical institutions that have shaped its current practice

Questioning Linguistics Naomi Knight,Ahmar Mahboob,2009-05-27 QUESTIONING LINGUISTICS brings together different perspectives on language studies and applications into a single volume and allows readers to examine how linguists of diverse traditions study and use this expert knowledge of language By doing so this volume invites us to reconsider the nature and focus of the field of study and questions a number of current thoughts about language theory application and use In effect the nature of linguistics linguistic theory and languages are called into question as are the methods that we as linguists may take for granted in our developed research traditions Scholars and researchers from within linguistics and beyond will find this volume both accessible and engaging as it gathers the thoughts and opinions of experts in the field alongside new theorists in an open forum for discussion that diminishes the borders between these diverse threads
