

Fetal Pig Anatomy Dissection

Sorry guys but you will not get the chance to examine the internal organs of a real human body. Instead, human anatomy can be studied by examining the systems of a pig, an animal similar to a human. The pigs we are dissecting are called fetal pigs. Fetal pigs have not been born. Evidence that they are fetal can be seen by examining the abdominal ventral area for the attached umbilical cord.

In this investigation, you will:

- Properly dissect a fetal pig's digestive, respiratory and circulatory systems to examine and identify its major organs and structures
- Label diagrams of a pig's systems

Materials:

Scissors
Scalpel
Dissecting tray

Dissecting probe
Dissecting pins
Goggles

Lab aprons
Metric ruler
String

Procedures:

External Anatomy

- Determine the sex of your pig. Both sexes have a double row of nipples along the ventral body surface therefore; these structures will not help you determine sex. A male pig has a small genital opening on the ventral surface below the area where the umbilical cord enters. A female pig has a vaginal opening next to the anus. These two openings are found under the pig's tail. A male pig has only the anal opening. If your pig is female, you should also note that ureogenital papilla is present near the genital opening.
- What is the sex of your pig?
- Gestation (length of internal development) for the fetal pig is 112-115 days. The length of the fetal pig can give you a rough estimate of its age.

11 mm - 21 days	4 cm - 56 days
17 mm - 35 days	22 cm - 100 days
2.8 cm - 49 days	30 cm - birth

How many days old was your pig? _____

- On the diagram below, label the following:

Head
Thorax
Abdomen

Forelimb
Hind Limb
Umbilical cord

Tail
Neck

How to Make a Spaceship Julian Guthrie, 2017-09-05 A New York Times bestseller The historic race that reawakened the promise of manned spaceflight Winner of the 2016 Eugene E Emme Award for Astronautical Literature A Finalist for the PEN E O Wilson Literary Science Writing Award Alone in a Spartan black cockpit test pilot Mike Melvill rocketed toward space He had eighty seconds to exceed the speed of sound and begin the climb to a target no civilian pilot had ever reached He might not make it back alive If he did he would make history as the world's first commercial astronaut The spectacle defied reason the result of a competition dreamed up by entrepreneur Peter Diamandis whose vision for a new race to space required small teams to do what only the world's largest governments had done before Peter

Diamandis was the son of hardworking immigrants who wanted their science prodigy to make the family proud and become a doctor. But from the age of eight when he watched Apollo 11 land on the Moon his singular goal was to get to space. When he realized NASA was winding down manned space flight Diamandis set out on one of the great entrepreneurial adventure stories of our time. If the government wouldn't send him to space he would create a private space flight industry himself. In the 1990s this idea was the stuff of science fiction. Undaunted Diamandis found inspiration in an unlikely place the golden age of aviation. He discovered that Charles Lindbergh made his transatlantic flight to win a \$25,000 prize. The flight made Lindbergh the most famous man on earth and galvanized the airline industry. Why Diamandis thought couldn't the same be done for space flight? The story of the bullet shaped SpaceShipOne and the other teams in the hunt is an extraordinary tale of making the impossible possible. It is driven by outsized characters Burt Rutan Richard Branson John Carmack Paul Allen and obsessive pursuits. In the end as Diamandis dreamed the result wasn't just a victory for one team it was the foundation for a new industry and a new age.
