R. M. Irving, 2010-06-03

Named one of BBC History Magazine's Books of the Year in 2010 In this groundbreaking study D R M Irving reconnects the Philippines to current musicological discourse on the early modern Hispanic world For some two and a half centuries the Philippine Islands were firmly interlinked to Latin America and Spain through transoceanic relationships of politics religion trade and culture The city of Manila founded in 1571 represented a vital intercultural nexus and a significant conduit for the regional diffusion of Western music Within its ethnically diverse society imported and local musics played a crucial role in the establishment of ecclesiastical hierarchies in the Philippines and in propelling the work of Roman Catholic missionaries in neighboring territories Manila's religious institutions resounded with sumptuous vocal and instrumental performances while an annual calendar of festivities brought together many musical traditions of the indigenous and immigrant populations in complex forms of artistic interaction and opposition Multiple styles and genres coexisted according to strict regulations enforced by state and ecclesiastical authorities and Irving uses the metaphors of European counterpoint and enharmony to critique musical practices within the colonial milieu He argues that the introduction and institutionalization of counterpoint acted as a powerful agent of colonialism throughout the Philippine Archipelago and that contrapuntal structures were reflected in the social and cultural reorganization of Filipino communities under Spanish rule He also contends that the active appropriation of music and dance by the indigenous population constituted a significant contribution to the process of hispanization Sustained enharmonic engagement between Filipinos and Spaniards led to the synthesis of hybrid syncretic genres and the emergence of performance styles that could contest and subvert hegemony Throwing new light on a virtually unknown area of music history this book contributes to current understanding of the globalization of music and repositions the Philippines at the frontiers of research into early modern intercultural exchange **So Help Us, God** Carl J.

Richard, 2025-04-15 The religious beliefs of America's leaders and the role of religion in public life have long captivated the American public In this book historian Carl J Richard looks at the many ways that the Bible has influenced America's leaders in their personal and political lives With chapters organized thematically Richard discusses the educational system familial

influences church experiences and religious revivals that have immersed presidents in the Bible their lifelong engagement with Scripture their biblically infused political rhetoric their powerful belief in a divine Providence that protected them and guided their nation their resultant belief in the power of prayer their belief in God given rights and spiritual equality their belief in a national mission to advance the cause of liberty across the globe their belief in the excellence of Christian ethics and in the necessity of religion to the survival and success of republican government their belief in an afterlife their religious differences the influence of the founding presidents biblical conception of human nature on their establishment of constitutional checks and balances and the effect of modern presidents more optimistic outlook on their willingness to undermine them So Help Us God American Presidents and the Bible will appeal to all readers interested in American presidential history and the role of religion in public life      *Hector-Neri Castañeda* H.
