returned to Europe Pervasive is one of the most important conferences in the area of pervasive and ubiquitous computing. In the previous year we had two categories of technical papers: Full Papers and Notes. Pervasive attracted 157 valid submissions from which the Technical Program Committee (TPC) accepted 24 full papers and one note, resulting in an overall acceptance rate of 16%. The submissions included 628 authors from 27 countries representing all the continents except Antarctica. As we can see from these figures, Pervasive is a truly global, highly competitive conference. A major conference such as Pervasive requires a rigorous and objective process for selecting papers. This starts with the selection of a high quality TPC. We were fortunate to be able to draw on the wisdom and experience of our 28 TPC members from the most prestigious universities and research labs in Europe, North America and Asia. This committee was aided by the input of no less than 238 external reviewers chosen on the basis of their domain knowledge and relevance to pervasive computing. The papers were selected using a double blind review with four peer reviews per paper, a discussion phase among the reviewers, and a discussion of the papers in the TPC meeting which was held in Palo Alto during December 12-13, 2009. We thank Nokia Research Center for hosting the meeting.

HWM, 2008-12. Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews.

A Comprehensive Guide to Enterprise Mobility Jithesh Sathyan, Anoop N., Navin Narayan, Shibu Kizhakke Vallathai, 2016-04-19. Although enterprise mobility is in high demand across domains, an absence of experts who have worked on enterprise mobility has resulted in a lack of books on the subject. *A Comprehensive Guide to Enterprise Mobility* fills this void. It supplies authoritative guidance on all aspects of enterprise mobility from technical aspects and applications to

The Bootstrapper's Guide to the New Search Optimization Deltina Hay, 2013-12. Anyone can easily and efficiently learn how to drive users to their website with the use of this handy guide to both traditional and nontraditional search engine optimization: SEO, Social search, real time search, semantic search, blog and RSS feed search, mobile engine and app search, and other search types need to be considered in order to optimize maximum exposure on the internet today. This book teaches how to prepare website content for semantic search engines, how search engines and social networking sites work together, how to apply organic search techniques to content and keyword lists, and how to apply it to an individualized framework to maximize online exposure. It goes on to provide analytical and metric tools to measure the success of the search optimization strategy. Using real world examples and avoiding technical jargon, this guide is perfect for businesspeople, entrepreneurs, and independent professionals who need practical, successful and fast results that bring customers to their websites.
