

Cancer Can Now Be Cured,

not only the early stages, but also advanced cancer, stages four and five, including imminent death. We are not accustomed to thinking about a cure. We think of remission as the only possibility. But this book is not about remission. It is about a cure. This is possible because the true cause of cancer has been found.

The Cause of the Malignancy

is explained in the earlier book, *The Cure for All Cancers*. But removing the malignancy left behind the tumors as they were, prior to the malignant development. So eliminating tumors became the focus of additional research, and is the subject of this book. The **21 Day Program** described in this book does both. Once you win this battle, even advanced cancer can be cured.

The Success Rate

for advanced cancer is about 95%. So you can count on this method, not merely hope it will work for you. It is a total approach that not only shrinks tumors, but also normalizes your blood chemistry, lowers your cancer markers, and returns your health. The small failure rate (5%) is due to clinical emergencies that beset the advanced cancer sufferer. However, if you combine the advice in this book with access to hospital care, even "hopeless" patients can gain the time necessary to become well again.

Hulda Regehr Clark

is an independent research scientist. Dr. Clark has a Bachelor of Arts, Magna Cum Laude, and a Master of Arts, with High Honors, from the University of Saskatchewan, Canada. Then she studied for two years at McGill University before attending the University of Minnesota and obtaining her Doctorate degree in physiology in 1958. After doing government sponsored research for almost ten years at Indiana University, she began private consulting in nutrition in 1979. She continued her studies to earn a

Naturopathy Degree and an amateur radio license. The freedom to follow her most promising observations led to the breakthrough discoveries described in this book.
