Bleichmar,2017-01-01 An unprecedented visual exploration of the intertwined histories of art and science of the old world and the new From the voyages of Christopher Columbus to those of Alexander von Humboldt and Charles Darwin the depiction of the natural world played a central role in shaping how people on both sides of the Atlantic understood and imaged the region we now know as Latin America Nature provided incentives for exploration commodities for trade specimens for scientific investigation and manifestations of divine forces It also yielded a rich trove of representations created both by natives to the region and visitors which are the subject of this lushly illustrated book Author Daniela Bleichmar shows that these images were not only works of art but also instruments for the production of knowledge with scientific social and political repercussions Early depictions of Latin American nature introduced European audiences to native medicines and religious practices By the 17th century revelatory accounts of tobacco chocolate and cochineal reshaped science trade and empire around the globe In the 18th and 19th centuries collections and scientific expeditions produced both patriotic and imperial visions of Latin America Through an interdisciplinary examination of more than 150 maps illustrated manuscripts still lifes and landscape paintings spanning four hundred years *Visual Voyages* establishes Latin America as a critical site for scientific and artistic exploration affirming that region s transformation and the transformation of Europe as vitally connected histories **Vertical Margins** Reuben J. Postcolonial Representations of Women Rachel Bailey Jones, 2011-06-11 In this accessible combination of post colonial theory feminism and pedagogy the author advocates using subversive and contemporary artistic representations of women to remodel traditional stereotypes in education It is in this key sector that values and norms are molded and prejudice kept at bay yet the legacy of colonialism continues to pervade official education received in classrooms as well as unofficial education ingested via popular culture and the media The result is a variety of distorted images of women and gender in which women appear as two dimensional stereotypes The text analyzes both current and historical colonial representations of women in a pedagogical context In doing so it seeks to recast our conception of what difference is challenging historical patriarchal gender relations with their stereotypical representations that continue to marginalize minority populations in the first world and billions of women elsewhere These distorted images the book argues can be subverted using the semiology provided by postcolonialism and transnational feminism and the work of contemporary artists who rethink and recontextualize the visual codes of colonialism These resistive images created by women who challenge and subvert patriarchal modes of representation can be used to create educational environments that provide an alternative view of women of non western origin

Legal Geography Matteo Nicolini, 2022-12-05 This book invites readers to critically rethink the interrelations between geography and the law

Traditionally legal geographical interrelations have been dominated by scholars with backgrounds in geopolitics economics or geography More recently a new interdisciplinary approach has been developed with the aim of offering a fresh perspective on how law and geography intersect There has been a steady growth in cross disciplinary research in this field how legal geographical taxonomies interrelate has attracted attention from scholars and academics with a diverse range of backgrounds namely law anthropology and human physical geography thus giving rise to several publications Against this backdrop the book adopts a legal comparative perspective and assesses normative spatialities which are the outcomes of processes of legal spatial production In addition the comparative analysis offers readers new insights on some traditional geographic features which are essential to legal studies territorial identity regional demarcation territorial alternation and place name policy Examples are drawn from several jurisdictions both from the Global North and the Global South and partly employ a diachronic perspective As its subversive character is ideally suited to revealing policies and agendas comparative law is used to identify the ethnocentric and colonial biases underpinning the use and misuse of legal geographic devices by policymakers and academics In sum the book presents legal geography as an interdisciplinary undertaking in which geographers and legal scholars can jointly examine common concepts in the historical cultural political and social contexts in which law is practised The book transcends the boundaries between disciplines to engage in a fruitful dialogue on how the law can help to address the current socio geographic and ecological crises

Eighteenth-Century Thing Theory in a Global Context Ileana Baird, Christina Ionescu, 2016-04-29 Exploring Enlightenment attitudes toward things and their relation to human subjects this collection offers a geographically wide ranging perspective on what the eighteenth century looked like beyond British or British colonial borders To highlight trends fashions and cultural imports of truly global significance the contributors draw their case studies from Western Europe Russia Africa Latin America and Oceania This survey underscores the multifarious ways in which new theoretical approaches such as thing theory or material and visual culture studies revise our understanding of the people and objects that inhabit the phenomenological spaces of the eighteenth century Rather than focusing on a particular geographical area or on the global as a juxtaposition of regions with a distinctive cultural footprint this collection draws attention to the unforeseen relational maps drawn by things in their global peregrinations celebrating the logic of serendipity that transforms the object into something else when it is placed in a new locale

World History Larry S. Krieger, Kenneth Neill, Steven L. Jantzen, 1994-02 **Colonial Rule and Crisis in Equatorial Africa** Christopher John Gray, 2002 A look at the encounter between the French and the peoples of Southern Gabon in terms of their differing conceptions of boundaries In the second half of the nineteenth century two very different practices of territoriality confronted

each other in Southern Gabon Clan and lineage relationships were most important in the local practice while the French practice was informed by a territorial definition of society that had emerged with the rise of the modern nation state and industrial capitalism This modern territoriality used an array of bureaucratic instruments such as maps and censuses previously unknown in equatorial Africa Such instruments denied the existence of locally created territories and were fundamental to the exercise of colonial power Thus modern territoriality imposed categories and institutions foreign to the peoples to whom they were applied As colonial power became more effective from the 1920s on those institutions started to be appropriated by Gabonese cultural elites who negotiated their meanings in reference to their own traditions The result was a strongly ambiguous condition that left its imprint on the new colonial territories and subsequently the postcolonial Gabonese state Christopher Gray was Assistant Professor of History Florida International University
