

ETS® Major Field Test in Master of Business Administration Sample Questions

Directions: This section contains independent questions as well as questions related to case-based scenarios. Each of the questions or incomplete statements is followed by four suggested answers or completions. Select the one that is best in each case.

1. Which of the following organizations is most likely to use project financing?
(A) A small start-up
(B) A financial services firm with an extensive client list
(C) A large consumer goods company
(D) A large public utility involved in infrastructure development
2. After an extensive recruitment process to select well-qualified individuals, a large percent of a company's new hires resigned within the first month of the job. Which of the following is the most likely explanation for this situation?
(A) The training process to prepare the new hires for their assigned tasks was inadequate.
(B) The health benefits provided by the company were not competitive with those of the rest of the industry.
(C) The starting salary for the new hires was not competitive with that of the rest of the industry.
(D) The new hires lacked the basic skills required to learn the job.
3. Proscio Ltd. employs a process cost system. Inspection of units occurs at the 50 percent mark. Defective units are then removed from the process, and their cost (\$4.50) is absorbed by the good units. Proscio has recently been approached by a firm wishing to buy the defective units for a special use. The firm would require Proscio to modify the defective units at a unit cost of \$2.00. If Proscio sells the defective units to the firm for \$5.00 each, how would Proscio's reported income be affected?
(A) It would decrease by \$4.50 per unit sold.
(B) It would decrease by \$1.50 per unit sold.
(C) It would increase by \$3.00 per unit sold.
(D) It would increase by \$5.00 per unit sold.
4. Some companies have little, if any, net income or earnings, yet they seem to have all the money they need for capital expenditures. Which of the following best explains how such companies operate?
(A) They have good cash flows.
(B) They lease capital equipment that does not show up on balance sheets.
(C) They have accounts with many different banks.
(D) They issue warrants to their officers.
5. The Sinter Corporation has just announced that it will pay \$1.10 per share in dividends to its stockholders in the current quarter. The prior quarter's dividend was \$1.00 per share. The announcement indicates which of the following?
(A) Management is sending a signal that it expects the economy to expand.
(B) Management is sending a signal that the company has good projected future earnings.
(C) While the company was able to pay a higher dividend, management preferred a more conservative figure.
(D) The company has overextended its cash position and may have liquidity problems in the future.
6. Wave Inc. is a telecommunications company that wants to become involved in e-commerce. It has to decide whether to develop a business-to-business or business-to-consumer strategy. As Wave's strategic planner, you have been asked to develop a business plan for each opportunity and present these to senior management. The answer to which of the following questions is most important to know before starting your plan?
(A) What are the company's core competencies?
(B) What is the potential market size?
(C) What is the impact on the estimated revenue?
(D) Does the company have e-commerce capabilities?

Handbook of Understanding and Measuring Intelligence Oliver Wilhelm,Randall W. Engle,2004-11-02 it is extremely useful and contemporary covering among its five hundred pages genetics neuro imaging and emotional intelligence It also provides a good indicator of current psychological work in the area with empirical evidence and theory sitting alongside each other The material on meta cognition would I suspect be of most interest to philosophers along with the more basic questions concerning the nature of memory and intelligence PRACTICAL PHILOSOPHY This volume provides an in depth yet accessible and up to date review of the key topics pertinent to current intelligence research This state of the art summary about our theoretical understanding of human abilities and their measurement is of interest for researchers practitioners and advanced students in psychology education and related disciplines It s a great summary and a good read on a truly important topic Dr Heinz Holling University of Muenster Wilhelm and Engle have compiled a highly informative set of chapters on various topics related to intelligence The chapters describing recent European work will be especially informative for North American readers The work is strengthened by provision of review chapters that keep the reader in sight of the forest rather than the trees Earl Hunt University of Washington Without an informed cognitive understanding of intelligence as a construct the technology of intelligence testing will make little to no progress Psychologists with a more psychometric background need detailed knowledge about the cognitive processes underlying intelligent behavior Likewise psychologists with a more cognitive or experimental background need to make more use of applied knowledge from psychometric research Earl Hunt Without an informed cognitive understanding of intelligence as a construct the technology of intelligence testing will make little to no progress Psychologists with a more psychometric background need detailed knowledge about the cognitive processes underlying intelligent behavior Likewise psychologists with a more cognitive or experimental background need to make more use of applied knowledge from psychometric research The Handbook of Understanding and Measuring

Intelligence provides an overview of recent studies on intelligence to help readers develop a sound understanding of results and perspectives in intelligence research. In this volume, editors Oliver Wilhelm and Randall W. Engle bring together a group of respected experts from two fields of intelligence research: cognition and methods, to summarize, review, and evaluate research in their areas of expertise. The chapters in this book present state-of-the-art examinations of a particular domain of intelligence research and highlight important methodological considerations, theoretical claims, and pervasive problems in the field. The Handbook provides those with a broad interest in individual differences, cognitive abilities, intelligence, educational measurement, thinking, reasoning, or problem solving with a comprehensive description of the status quo and prospects of intelligence research. The book is divided into two parts that are intended to build upon and relate to one another. Part I, the cognitive section, explores several theoretical viewpoints on intelligence, and Part II, the methodological section, addresses fundamental statistical problems and pragmatic assessment problems in measuring intelligence. Key Features: The volume editors provide a general introduction and conclude the book with an integrative epilogue. Contributors to this volume are experts in intelligence with a background in methodology or theory who offer current theoretical perspectives and recent empirical results which are of interest to a broad audience. In addition to contributions from U.S. intelligence experts, authors from Europe and Australia provide an international perspective and articulate viewpoints and results not otherwise readily available to an American audience. Developments in theory are described with respect to their implications at the measurement level, and developments on the methodological level are evaluated with respect to their contribution to the theoretical understanding of intelligence. The Handbook is designed for scholars and psychology professionals interested in intelligence, cognitive abilities, educational testing, and measurement, reasoning, and problem solving. It can also be used by advanced undergraduate and graduate students studying intelligence or the psychology of individual differences. In addition, the Handbook will be a welcome addition to any academic library.

Cases and Stories of Transformative Action

Research John A. Bilorusky, 2021-04-20. *Cases and Stories of Transformative Action Research* builds on its companion book *Principles and Methods of Transformative Action Research* by describing and analyzing dozens of examples of successful action research efforts pursued in the past five decades by students and faculty of the Western Institute for Social Research. Some projects are large scale and some are modest interventions in the everyday lives of those participating. Some are formal organizational efforts; others are the results of individual or small group initiatives. Included are chapters on community needs assessments and innovative grassroots approaches to program evaluation, the challenges of improving our decision making during the crisis of the COVID-19 pandemic, strategies of intellectual activism in addressing the growing problem of workplace bullying, action research to preserve and share the history of the Omaha tribe, and plans for an innovative school-based project based on collaborative action and inquiry between students and Artificial Intelligence. In addition, there are a number of detailed stories about the use of transformative action research in such areas as somatic and trauma counseling.

ethnic studies health disparities gender differences grassroots popular education and the improvement of statewide steps for preventing child abuse among many others This book can serve as an undergraduate or graduate social sciences text on research methods It is also a guidebook for action oriented research by academics professionals and lay people alike
