**Foundations of Multinational Financial Management** Alan C. Shapiro, Atulya Sarin, 2008-02-25 Now updated and reorganized Alan Shapiro's *Foundations of Multinational Financial Management 6e* emphasizes broad concepts and practices and provides a clear conceptual framework for analyzing key financial decisions in multinational firms. The text treats international financial management as a natural and logical extension of the principles learned in the foundations course in financial management. Thus it builds on and extends the valuation framework provided by domestic corporate finance to account for dimensions unique to international finance. Shapiro 6e is primarily intended for an undergraduate audience but it is suitable for use in masters level courses when there is not time to cover the full range of topics. This text assumes no prior knowledge of international finance.

**Multinational Financial Management** Alan C. Shapiro, 1996 Grounded in modern financial theory this text provides a conceptual framework wherein the key financial decisions of the multinational firm can be analyzed. As in previous editions the book's approach treats international financial management as a natural and logical extension of principles learned in the foundations of financial management courses. This fifth edition has been updated and improved to reflect the most recent developments in the field.

**Foundations of Multinational Financial Management 6e + Study Guide** Shapiro, 2008-11-21

**Multinational Financial Management, EMEA Edition** Alan C. Shapiro, Paul Hanouna, 2021-06-16 The eleventh edition of *Multinational Financial Management* is a comprehensive survey of the essential areas of the international financial market environment including foreign exchange and derivative markets, risk management and international capital markets and portfolio investment. Designed for upper level undergraduate and masters level courses in international finance and management this textbook offers readers a conceptual framework for analyzing key financial decisions of multinational firms. The authors both explain and simplify multinational financial management by illustrating how its basic principles share the same foundation as domestic corporate finance. Assuming no prior knowledge of international economics or finance this substantially revised new edition builds upon the fundamental principles of domestic financial management to examine the unique dimensions of international finance. Readers are presented with a solid theoretical knowledgebase for examining decision problems as well as practical analytical techniques that clarify the often ambiguous guidelines used by international financial executives. All the traditional areas of corporate finance are explored from the perspective of a multinational corporation focusing on elements rarely encountered in domestic finance such as multiple currencies, segmented capital markets and political risks of nationalization or expropriation.
