Contemporary Demographic Transformations in China, India and Indonesia Christophe Z. Guilmoto, Gavin W. Jones, 2015-12-12 This book examines the profound demographic transformation affecting China India and Indonesia where 40% of the world's people live It offers a systematic comparative approach that will help readers to better understand the changing social and regional recomposition of the population in these regions The chapters present a detailed investigation and mapping of regional trends in mortality fertility migration and urbanization education and aging Throughout the analysis carefully considers how these trends affect economic and social development Coverage also raises global theoretical questions about the singular ways in which each of these three countries have achieved their demographic transition As the authors reveal demographic trends seem to be somewhat linear and anticipatable providing

Asia's three demographic giants and their governments a formidable advantage in planning for the future. But the evolution of human mobility in China, India and Indonesia closely intertwined as it is with changing economic conditions appears less predictable and ranks high among the major challenges to demographic knowledge in the coming decades. Offering an insightful look into the components, implications and regional variations of a changing population, this book will appeal to social scientists, demographers, anthropologists, sociologists, epidemiologists and specialists in Asian studies.

Plantation Life Tania Murray Li, Pujo Semedi, 2021-09-27 In *Plantation Life* Tania Murray Li and Pujo Semedi examine the structure and governance of Indonesia's contemporary oil palm plantations in Indonesia which supply 50 percent of the world's palm oil. They attend to the exploitative nature of plantation life wherein villagers' well-being is sacrificed in the name of economic development. While plantations are often plagued by ruined ecologies, injury among workers and a devastating loss of livelihoods for former landholders, small-scale independent farmers produce palm oil more efficiently and with far less damage to life and land. Li and Semedi theorize corporate occupation to underscore how massive forms of capitalist production and control over the palm oil industry replicate colonial-style relations that undermine citizenship. In so doing they question the assumption that corporations are necessary for rural development, contending that the dominance of plantations stems from a political system that privileges corporations.

Economics, Social Sciences and Information

Management Ford Lumban Gaol, Fonny Hutagalung, 2015-12-29 The 2015 International Congress on Economics, Social Sciences and Information Management (CESSIM 2015) held 28-29 March 2015 in Bali, Indonesia, aimed to provide a platform for the sharing of valuable knowledge and experience in the context of changing economics and social settings. Information technology has changed many aspects in our life.

The Impact of Climate Change on Our Life Abdelnaser

Omran, Odile Schwarz-Herion, 2018-02-23 This book introduces the highly topical issue from many different angles, sensitizing readers to the various challenges to human life posed by climate change, identifying possible intentional and inadvertent anthropogenic factors and consequences and seeking socially and environmentally viable solutions. The book begins by examining the impact of the climate change discussion on science, politics, economy and culture from its historical origin in the first Club of Rome Report and its inclusion in the UN's SDGs to the Paris Agreement and beyond. Comprising 12 chapters, it analyses the factors which caused the catastrophic 2014 Kelantan flood in Malaysia, focusing on the Kuala Krai district and discusses mud architecture in Wadi Hadramout, Yemen, and mitigating the expected effects of climate change on this unique architecture and cultural heritage. It also examines the economic costs of climate change on health and the increased burden on individual expenditures and national health systems. The role of climate change in the water-energy nexus and efforts to increase efficiency in energy and water end-use to increase Queensland's agricultural sector's resilience in Australia is addressed, as is water security and climate change issues in developing countries and the potential of partnership procurement strategies for managing sustainable urban water supply in Nigerian cities. It also includes a chapter offering a

new approach to waste management exploring to what extent waste can complicate our daily actions and influence environmental decay and recommending that renewable materials be sorted and separated from other types of materials to avoid cross contamination to increase the value of the materials and to ease the process of manufacturing Subsequent chapters identify factors sustaining the municipal solid waste management and practices in Ajdabiya city in Libya and look at accounting disclosure remedies by exploring areas in which sustainability reporting could expand beyond corporate environmental reporting to additional disclosures curbing recklessness in pursuing merely economic goals The book shows from the perspective of agriculture how human activities can increase the negative impacts of climate change on lifestyle in Malaysia suggesting alternative lifestyles and encouraging international cooperative efforts The last chapters evaluate the impacts of various environmental factors on the local tourism sector in Pakistan and discuss strategies to tackle climate change focusing on the opportunities and risks of climate engineering Since these risks encompass inadvertent negative effects and targeted abuse for covert weather warfare and terrorism that violate the UN s ENMOD convention the author recommends viable alternatives to deal with climate change

Proceedings of the International Conference on Education 2022 (ICE 2022) Aji Prasetya Wibawa,Riska Pristiani,Gulsun Kurubacak,Siti Salina Mustakim,Dedi Kuswandi,Roni Herdianto,2023-03-22 This is an open access book This conference proceeding constitutes a selection of the best papers from the International Conference on Education 2022 ICE 2022 held in Malang Indonesia in October 2022 This conference proceeding is a collection of research findings and viewpoints relating to education and any subject associated to the present trend of education This trend is lead by the set of improvements and changes in the instructional societal and technological structures and processes towards the endeavor of accomplishing the goals The conference proceeding also extends to compile the papers discussing the issues in relation to emerging technologies for educational context such as ethical issues security and privacy quality control accreditation and sustainability issues and cultural issues
