Database and Expert Systems Applications Fernando Galindo, Makoto Takizawa, Roland Traunmueller, 2004-08-19 DEXA 2004 the 15th International Conference on Database and Expert Systems Applications was held August 30 September 3 2004 at the University of Zaragoza Spain The quickly growing spectrum of database applications has led to the establishment of more specialized discussion platforms DaWaK Conference EC Web Conference EGOVConference Trustbus Conference and DEXA Workshop Every DEXA event has its own conference proceedings which were held in parallel with the DEXA Conference also in Zaragoza In your hands are the results of much effort The work begins with the preparation of the submitted papers which then go through the reviewing process The accepted papers are revised to final versions by their authors and are then arranged within the conference program All culminates in the conference itself For this conference 304 papers were submitted and I want to thank to all who contributed to it they are the real base of the conference The program committee and the supporting reviewers produced altogether 942 referee reports in average 3 1 reports per paper and selected 92 papers for presentation At this point we would like to say many thanks to all the institutions that actively supported this conference and made it possible These were University of Zaragoza FAW DEXA Association Austrian Computer Society

**Introduction To Computational Earthquake Engineering (Third Edition)** Muneo Hori, 2018-06-14 This book provides rigorous foundations of applying modern computational mechanics to earthquake engineering The scope covers the numerical analysis of earthquake wave propagation processes and the faulting processes and also presents the most advanced numerical simulations of earthquake hazards and disasters that can take place in an urban area Two new chapters included are advanced topics on high performance computing and for constructing an analysis model This is the first book in earthquake engineering that explains the application of modern numerical computation which includes high performance computing to various engineering seismology problems

**Entity-Relationship Approach - ER '93** Ramez A. Elmasri, 1994-07-28 This monograph is devoted to computational morphology particularly to the construction of a two dimensional or a three dimensional closed object boundary through a set of points in arbitrary position By applying techniques from computational geometry and CAGD new results are developed in four stages of the construction process a the gamma neighborhood graph for describing the structure of a set of points b an algorithm for constructing a polygonal or polyhedral boundary based on a c the flintstone scheme as a hierarchy for polygonal and polyhedral approximation and localization d and a Bezier triangle based scheme for the construction of a smooth piecewise cubic boundary

Introduction To Computational Earthquake Engineering (2nd Edition) Muneo Hori, 2011-05-18 Introduction to Computational Earthquake Engineering covers solid continuum mechanics finite element method and stochastic modeling comprehensively with the second and third chapters explaining the numerical simulation of strong ground motion and faulting respectively Stochastic modeling is used for uncertain underground structures and advanced analytical methods for linear and non linear stochastic

models are presented The verification of these methods by comparing the simulation results with observed data is then presented and examples of numerical simulations which apply these methods to practical problems are generously provided Furthermore three advanced topics of computational earthquake engineering are covered detailing examples of applying computational science technology to earthquake engineering problems

**View-based Solutions for Schema Evolution Problems** Amy Jyh-Liang Lee,1998

**Database Systems for Advanced Applications** Lizhu Zhou,Beng Chin Ooi,Xiaofeng Meng,2005-04-04 This book constitutes the refereed proceedings of the 10th International Conference on Database Systems for Advanced Applications DASFAA 2005 held in Beijing China in April 2005 The 67 revised full papers and 15 revised short papers presented were carefully reviewed and selected from 302 submissions The papers are organized in topical sections on bioinformatics water marking and encryption XML query processing XML coding and metadata management data mining data generation and understanding music retrieval query processing in subscription systems extending XML Web services high dimensional indexing sensor and stream data processing database performance clustering and classification data warehousing data mining and Web data processing moving object databases temporal databases semantics XML update and query patterns join processing and view management spatial databases enhancing database services recovery and correctness and XML databases and indexing

*Introduction to Computational Earthquake Engineering* Muneo Hori,2006 This book introduces new research topics in earthquake engineering through the application of computational mechanics and computer science The topics covered discuss the evaluation of earthquake hazards such as strong ground motion and faulting through applying advanced numerical analysis methods useful for estimating earthquake disasters These methods based on recent progress in solid continuum mechanics and computational mechanics are summarized comprehensively for graduate students and researchers in earthquake engineering The coverage includes stochastic modeling as well as several advanced computational earthquake engineering topics Contents Preliminaries Solid Continuum Mechanics Finite Element Method Stochastic Modeling Strong Ground Motion The Wave Equation for Solids Analysis of Strong Ground Motion Simulation of Strong Ground Motion Faulting Elasto Plasticity and Fracture Mechanics Analysis of Faulting Simulation of Faulting BEM Simulation of Faulting Advanced Topics Integrated Earthquake Simulation Unified Visualization of Earthquake Simulation Standardization of Earthquake Resistant Design Appendices Earthquake Mechanisms Analytical Mechanics Numerical Techniques of Solving Wave Equation Unified Modeling Language Key Features Includes a detailed treatment of modeling of uncertain ground structures such as stochastic modeling Explains several key numerical algorithms and techniques for solving large scale non linear and dynamic problems Presents applications of methods for simulating actual strong ground motion and faulting Readership Graduate students and researchers in earthquake engineering researchers in computational mechanics and computer science

**Handbook on Enterprise Architecture** Peter Bernus,Laszlo Nemes,Günter Schmidt,2012-12-06 This Handbook is about methods tools and examples of how to architect an enterprise through

considering all life cycle aspects of Enterprise Entities such as individual enterprises enterprise networks virtual enterprises projects and other complex systems including a mixture of automated and human processes The book is based on ISO15704 2000 or the GERAM Framework Generalised Enterprise Reference Architecture and Methodology that generalises the requirements of Enterprise Reference Architectures Various Architecture Frameworks PERA CIMOSA Grai GIM Zachman C4ISR DoDAF are shown in light of GERAM to allow a deeper understanding of their contributions and therefore their correct and knowledgeable use The handbook addresses a wide variety of audience and covers methods and tools necessary to design or redesign enterprises as well as to structure the implementation into manageable projects

**Processing and Managing Complex Data for Decision Support** Darmont, Jérôme, Boussaid, Omar, 2006-03-31 This book provides an overall view of the emerging field of complex data processing highlighting the similarities between the different data issues and approaches Provided by publisher

**Intelligent Multimedia Databases and Information Retrieval: Advancing Applications and Technologies** Yan, Li, 2011-09-30 As consumer costs for multimedia devices such as digital cameras and Web phones have decreased and diversity in the market has skyrocketed the amount of digital information has grown considerably Intelligent Multimedia Databases and Information Retrieval Advancing Applications and Technologies details the latest information retrieval technologies and applications the research surrounding the field and the methodologies and design related to multimedia databases Together with academic researchers and developers from both information retrieval and artificial intelligence fields this book details issues and semantics of data retrieval with contributions from around the globe As the information and data from multimedia databases continues to expand the research and documentation surrounding it should keep pace as best as possible and this book provides an excellent resource for the latest developments
