## **Exeter Weather Report England:**

**A Mist Connection** Katrin Kleemann, 2023-06-06 In the summer of 1783 an unusual dry fog descended upon large parts of the northern hemisphere The fog brought with it bloodred sunsets a foul sulfuric odor and a host of other peculiar weather events Inspired by the Enlightenment many naturalists attempted to find reasonable explanations for these occurrences Between 8 June 1783 and 7 February 1784 a 27 kilometer long fissure volcano erupted in the Icelandic highlands It produced the largest volume of lava released by any volcanic eruption on planet Earth in the last millennium In Iceland the eruption led to the death of one fifth of the population The jetstream carried its volcanic gases further afield to Europe and beyond where they settled as a fog the origin of which puzzled naturalists and laypersons A Mist Connection is an environmental history that documents the Laki eruption and its consequences for Iceland and the wider world The book combines methods of historical disaster research climate history global history history of science and geology in an interdisciplinary approach Icelandic flood lava eruptions of this scale have a statistical recurrence period of 200 to 500 years it is crucial to understand their nature so that we can prepare for the next one An eruption of this magnitude would surely be disastrous for our modern globalized and interconnected world

*I Can Only Paint* Irene Gammel, 2022-03-30 For Canadian impressionist Mary Riter Hamilton capturing the emotional landscape of battlefields and graveyards in the months after the Great War s armistice became an artistic calling and defined her work A woman alone after the storm had passed she found that her life after the war was indelibly marked by the experience Undeterred by a rejection from the Canadian War Memorials Fund who nominated only male war artists abroad in 1919 Hamilton received a commission from the Amputation Club of British Columbia now the War Amps to commemorate those lost at war She travelled from Victoria to the pre reconstruction battlefields and towns of the Somme Vimy Ridge and the Ypres Salient where amid harsh conditions inadequate shelter and

food surroundings littered with unexploded shells she recorded with determination pride and grace the ruins of war Based on intensive archival research in Canada France and Belgium and using many previously unpublished letters *I Can Only Paint* offers an insider's view of the artist's vast underexplored body of war work and the conditions in which she created it It places this period central though it was in the context of a full understanding of her life and restores the work she created there to its proper place in the canon of war art in Canada and abroad Irene Gammel argues that Hamilton's work encoded a female perspective that distinguishes her paintings from the work of official Canadian war artists The first reliable account of Hamilton's impressions of Canada's most haunting sites of conflict *I Can Only Paint* captures with detail and sensitivity an experience that defined her life and recovers a body of work that stands as a unique and enduring portrait of the effects of the Great War

*Victorian Science and Imagery* Nancy Rose Marshall, 2021-07-27 The nineteenth century was a period of science and imagery when scientific theories and discoveries challenged longstanding boundaries between animal plant and human and when art and visual culture produced new notions about the place of the human in the natural world Just as scientists relied on graphic representation to conceptualize their ideas artists moved seamlessly between scientific debate and creative expression to support or contradict popular scientific theories such as Darwin's theory of evolution and sexual selection deliberately drawing on concepts in ways that allowed them to refute popular claims or disrupt conventional knowledges Focusing on the close kinship between the arts and sciences during the Victorian period the art historians contributing to this volume reveal the unique ways in which nineteenth century British and American visual culture participated in making science and in which science informed art at a crucial moment in the history of the development of the modern world Together they explore topics in geology meteorology medicine anatomy evolution and zoology as well as a range of media from photography to oil painting They remind us that science and art are not tightly compartmentalized separate influences Rather these are fields that share forms manifest as waves layers lines or geometries that invest in the idea of the evolution of form and that generate surprisingly kindred responses such as pain pleasure empathy and sympathy

*Fundamentals of Weather and Climate* Robin McIlveen, 2010-05-27 Originally published in 1986 as *Basic meteorology* a physical outline Weather, 1961 A monthly magazine for all interested in meteorology **The English Cyclopaedia ...**

, 1866 **Monthly Weather Report**, 1924 The Meteorological Magazine, 1985 Flood Forecasting Thomas E. Adams, Chandana Gangodagamage, Thomas C. Pagano, 2024-09-18 *Flood Forecasting A Global Perspective Second Edition* covers hydrologic forecasting systems on both a national and regional scale This updated edition includes a breakdown by county contribution and solutions to common issues with a wide range of approaches to address the difficulties inherent in the development implementation and operational success of national scale flood forecasting systems Special attention is given to recent advances in machine learning techniques for flood forecasting Overall the information will lead to improvements of existing systems and provide a valuable reference on the intricacies of forecast systems in different parts of

the world Covers global and regional systems thus allowing readers to understand the different forecasting systems and how they developed Offers practical applications for groups trying to improve existing flood forecasting systems Includes innovative solutions for those interested in developing new systems Contains analytical and updated information on forecasting and monitoring systems

**Science in the Met Office** Great Britain: Parliament: House of Commons: Science and Technology Committee, 2012-02-21 The Met Office currently operates as a Trading Fund within the Department of Business Innovation and Skills BIS The Committee welcomes the move to BIS particularly given the potential for closer links with the research base and the opportunity to develop further its commercial activities Core services though for the public service must be maintained The Met Office generates a significant proportion of its revenues from Government contracts and Customer Service Agreements in addition to its commercial services and the Government should provide clearly defined funding commitments This would allow the Met Office to take a longer term perspective on scientific and operational development The Government has no plans to privatise the Met Office which the Committee saw as putting at risk the strong partnerships built with international partners and the sharing of crucial meteorological data Also the Committee welcomes the Government's initiative of Public Data Corporation Some concern though is expressed that scientific advances in weather forecasting and the associated public benefits particularly in regard to severe weather warnings are available but are being held back by insufficient supercomputing capacity The Met Office should attempt to streamline the scrutiny of science under one committee and develop a strong customer relationship with key government departments

Monthly Weather Reports Great Britain. Meteorological Office, 1981 *English Mechanic and World of Science*, 1913 *The Contemporary Medieval in Practice* Clare A. Lees, Gillian R. Overing, 2019-10-07 Contemporary arts both practice and methods offer medieval scholars innovative ways to examine explore and reframe the past Medievalists offer contemporary studies insights into cultural works of the past that have been made or reworked in the present Creative critical writing invites the adaptation of scholarly style using forms such as the dialogue short essay and the poem these are the authors argue appropriate ways to explore innovative pathways from the contemporary to the medieval and vice versa Speculative and non traditional The Contemporary Medieval in Practice adapts the conventional scholarly essay to reflect its cross disciplinary creative subject This book does Medieval Studies differently by bringing it into relation with the field of contemporary arts and by making practice in the sense used by contemporary arts and by creative critical writing central to it Intersecting with a number of urgent critical discourses and cultural practices such as the study of the environment and the ethics of understanding bodies identities and histories this short accessible book offers medievalists a distinctive voice in multi disciplinary trans chronological collaborative conversations about the Humanities Its subject is early medieval British culture often termed Anglo Saxon Studies c 500 1100 and its relation with use of and re working in contemporary visual poetic and material culture after 1950 The Contemporary Medieval in Practice is both wise and unafraid to take risks Fully embedded in

scholarship yet reaching into unmapped territory the authors move across disciplines and forge surprising links Thought provoking and evocative this is a book that will have an impact that far belies its modest length Linda Anderson Newcastle University Reports Great Britain.
