Essential reading for teachers education administrators and policymakers alike STARRED Library Journal The untold story of the root cause of America's education crisis It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education The problem wasn t one of the usual scapegoats lazy teachers shoddy facilities lack of accountability It was something no one was talking about the elementary school curriculum s intense focus on decontextualized reading comprehension skills at the expense of actual knowledge In the tradition of Dale Russakoff's The Prize and Dana Goldstein's The Teacher Wars Wexler brings together history research and compelling characters to pull back the curtain on this fundamental flaw in our education system one that fellow reformers journalists and policymakers have long overlooked and of which the general public including many parents remains unaware But The Knowledge Gap isn t just a story of what schools have gotten so wrong it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have come along students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed If we truly want to fix our education system and unlock the potential of our neediest children we have no choice but to pay attention Teaching and Learning for the Twenty-First Century Fernando M. Reimers, Connie K. Chung, 2019-01-02 This book describes how different nations have defined the core competencies and skills that young people will need in order to thrive in the twenty first century and how those nations have fashioned educational policies and curricula meant to promote those skills The book examines six countries Chile China India Mexico Singapore and the United States exploring how each one defines supports and cultivates those competencies that students will need in order to succeed in the current century Teaching and Learning for the Twenty First Century appears at a time of heightened attention to comparative studies of national education systems and to international student assessments such as those that have come out of PISA the Program for International Student Assessment led by the Organisation for Economic Co operation and Development This book s crucial contribution to the burgeoning field of international education arises out of its special attention to first principles and thus to first questions As Reimers and Chung explain much can be gained by an explicit investigation of the intended purposes of education in what they attempt to teach students and in the related questions of why those purposes and how they are achieved These questions are crucial to education practice and reform at a time when educators and the students they serve face unique pressing challenges The book s detailed attention to such questions signals its indispensable value for policy makers scholars The Leaders of Their Own Learning Companion Ron Berger, Anne Vilen, Libby and education leaders today Woodfin, 2019-09-17 A New Companion to Leaders of Their Own Learning Puts Students in Charge of Their Learning and Growth Five years after the publication of Leaders of Their Own Learning EL Education is back with a new companion guide to help you tackle the common challenges of student engaged assessment This unique student centered approach to

play this role No one museum can be all things to all prospective learners they will be better suited to some approaches than to others This new edition identifies these approaches and enables museums to find the paths for which they are individually best suited to help them identify their own unique approaches to facilitating museum learning Each one s mission and vision its relationships with institutional and public stakeholders local cultural and market factors its individual collection and programmatic strengths its financial position all of these things matter This second edition aims to help each museum find the right approach to learning for its unique situation by showing them the range of museum personalities in terms of their being learning institutions what constitutes each type and what the implications are of choosing one or another approach for a particular museum A major theme of the 2nd edition of The Manual of Museum Learning is museum as connector the ways in which museums are facilitating self directed learning by connecting people with resources Not all will connect audiences with learning vehicles in the same way If museum learning is affective learning then it is the role of the museum to connect its visitors program participants and others who benefit from its knowledge to the learning resources that best suit the institution s strengths and matches them to the learning needs of the museum s audiences By connecting users to the resources they are most interested in or which best suit each individual s particular learning styles museums are at their best when they empower individuals to design their own learning experience in ways that resonate best with each individual
