Golding, 2017-02-26 This book explains how and where copper and fossil fuels were formed and the likely future for the extraction of copper and coal The colourful chronology of our efforts to extract metals from minerals and energy from fossil fuels is presented from earliest times until the present day The difficult concept of human sustainability is examined in the context of continually decreasing real prices of energy and metals This book integrates the latest findings on our historic use of technology to continually produce cheaper metals even though ore grades have been decreasing Furthermore it shows that the rate of technological improvement must increase if metals are to be produced even more cheaply in the future      **Spontaneous Oxidation and Combustion of Sulfide Ores in Underground Mines** Donald J. Ninteman, 1978      *Processing of Complex Ores* G. S. Dobby, S. R. *Geochemical Studies* Bozzano G Luisa, 2012-12-02 *Geochemical Studies* is a collection of papers dealing with ore petrology particularly on the genesis of ores found in sediments One paper describes the minor elements in metal deposits in

sedimentary rocks focusing on geochemical work on certain classes of ores in sediments and on the theories of origin of the deposits With better techniques of microprobe analysis of trace elements the paper notes that ore deposits in sedimentary rocks can be characterized by their minor element suites One paper points out that large ore deposits cannot possibly be formed by a migration of substances known as negative diffusion The paper estimates that the quantities of material that can be accumulated in a sediment horizon with a great affinity for these materials say in a period of one billion years will still not be sufficient to produce a large ore deposit The paper estimates the necessary diffusion coefficients that occur in deep structures where increased mobilities of various substances occur Geologists geochemists and engineers working with fossil fuels will find the collection highly significant List of Journal Articles by Bureau of Mines Authors Published July 1, 1910, to January 1, 1960, with Subject Index United States.
