<b>Organization</b>	My writing has a clear introduction, body paragraph(s), and conclusion. Each paragraph has 3-5 sentences. Each of my paragraphs directly states the main idea/topic being discussed in that particular paragraph.	It is not easy to tell where my paragraphs start and end. Only some of my paragraphs have 3-5 sentences. Only some of my paragraphs have a main idea/topic in each paragraph.	I did not understand how to format my five paragraph essay. Most of my paragraphs only have 2 sentences. There is no theme to each paragraph.
<b>Content</b>	My writing makes sense. It has many details that help the reader imagine what I am describing. I did a great job researching information.	My writing mostly makes sense and has some details. I forget to compare and contrast in every paragraph.	My writing does not make sense and/or has few details. I did not compare and contrast the two animals.
<b>Voice</b>	It sounds like me giving information about my plant or animal. You can hear my voice and tell I am interested in what I am writing about.	It sounds like me in parts of my writing. It is pretty clear that I did not choose animals that I cared about.	I don't sound interested in what I am writing about.
<b>Word Choice</b>	My writing painted a picture in the reader's mind with strong word choices (powerful verbs and adjectives).	I used just a few interesting words. My words were mostly simple and not intriguing/interesting to the reader.	I used very simple words and repeated many words throughout.
<b>Fluency</b>	My sentences flow from one to the next one starting differently, so that there are a variety of sentences.	Sometimes my sentences are a bit choppy or too long. My paper included too many simple and run-on sentences.	The sentences are all too short or all too long. The story does not flow when read aloud.
<b>Conventions</b>	I used correct capitalization, punctuation, grammar, and spelling. I used my own sentences when crafting a factual sentence.	Most of my sentences have uppercase letters, punctuation, correct grammar, and few spelling errors. I mostly used sentences from the website when typing my essay.	My writing is missing many uppercase letters, punctuation, and has many grammar and spelling errors. I copy and pasted all of my facts into my essay.
<b>Presentation</b>	My brainstorm, draft, and final copy look clear, neat, and polished. You can tell I gave my personal best!	My handwriting is legible but could be better (draft/brainstorm).	My work is difficult to read (draft/brainstorm).

The book aims to empower students by creating classroom spaces where all voices are heard, valued, and empowered. It draws on research from scholars who study discourse and offers insights into how discourse can be used to promote language and literacy development, honor all students' voices, and empower them. This book also provides guidance on culturally and linguistically sustaining discourse practices and encourages educators to incorporate students' home languages and discourse practices in classroom instruction. It challenges educators to move away from centering White English and represent language more responsibly within the classroom. This research is a valuable resource for academic scholars and a useful tool for teachers looking to cultivate student-centered classroom practices. By encouraging discourse among students, educators can create a space where human life holds meaning and students feel empowered to act and use their voices.

**Developing and Validating Test Items** Thomas M. Haladyna, Michael C. Rodriguez, 2013-07-18 Since test items are the building blocks of any test, learning how to develop and validate test items has always been critical to the teaching-learning process. As they grow in importance and use, testing programs increasingly supplement the use of selected-response multiple-choice items with constructed-response formats. This trend is expected to continue. As a result, a new item-writing book is needed, one that provides comprehensive coverage of both types of items and of the validity theory underlying them. This book is an outgrowth of the author's previous book, *Developing and Validating Multiple-Choice Test Items*, 3e (Haladyna, 2004). That book achieved distinction as the leading source of guidance on creating and validating selected-response test items. Like its predecessor, the content of this new book is based on both an extensive review of the literature and on its author's long experience in the testing field. It is very timely in this era of burgeoning testing programs, especially when these items are delivered in a computer-based environment. Key features include Comprehensive and Flexible: No other book so thoroughly covers the field of test-item development and its various applications. Focus on Validity: Validity, the most important consideration in testing, is stressed throughout and is based on the Standards for Educational and Psychological Testing, currently under revision by AERA, APA, and NCME. Illustrative Examples: The book presents various selected and constructed-response formats and uses many examples to illustrate correct and incorrect ways of writing items. Strategies for training item writers and developing large numbers of items using algorithms and other item-generating methods are also presented. Based on Theory and Research: A comprehensive review and synthesis

of existing research runs throughout the book and complements the expertise of its authors Think It, Show It Science Gregory A. Denman, 2013-06-01 Teach students to think and express themselves scientifically through step by step strategies that develop concise writing and discussion skills With Think It Show It Science students in grades 3 8 will learn through guided instruction how to express themselves scientifically represent their conjectures and results in written form and gain essential critical thinking skills Strategy instruction is supported by the included student activities sentence frames rubrics exemplar writing samples and graphic organizers *Portfolios Across Educational Contexts* Sheila Valencia, 1997
