

Figure 10.1

Examine the karyotype in Figure 10.1. Is it male or female?

Figure 10.1 is male.

How do you know?

Because there is one large X chromosome and one small Y chromosome. If there is one large X chromosome and one small Y chromosome, it is male. If there is one large X chromosome and one small X chromosome, it is female.

How do chromosomes appear in cells in your body?

10. **Check your understanding:** Do the cells in Figure 10.1 appear to be from a male or a female? Which chromosomes do you think have been affected by the mutation?

Answer: The cells in Figure 10.1 appear to be from a male. The sex chromosomes are one large X chromosome and one small Y chromosome. The Y chromosome has been affected by the mutation.
