

SECONDARY FLIGHT CONTROLS (Cont)**COMPONENTS AND OPERATION****SPOILER ELECTRONIC CONTROL UNIT (SECU)**

Two electronic units, SECU 1 and SECU 2, control the spoilers. The SECUs contain all the functions necessary to transmit the spoiler sensor outputs and control the spoiler actuators. The SECUs also supply crew-alerting system messages, maintenance messages, and flight-data recorder data.

FLIGHT SPOILERS LEVER

The flight spoilers lever provides symmetric deployment of two pairs of multifunction spoilers via the SECU. In normal operation there are nine detented positions between 0 and MAX. The 0 position is gated and requires pressing the push button on top of the lever to release. The 0 position can be reselected without pushing the button. A tenth position for emergency descent is also available. The EMER position is gated and requires pressing the push button to engage. The lever will return anywhere within the 0 to MAX position from EMER without pressing the button.

The spoiler graphic display on the top half of the left MFD declutters after 60 seconds when the spoilers are retracted. The graphic will automatically be displayed again when the ground or flight spoilers are extended or a spoiler failure exists.
