Front suspension

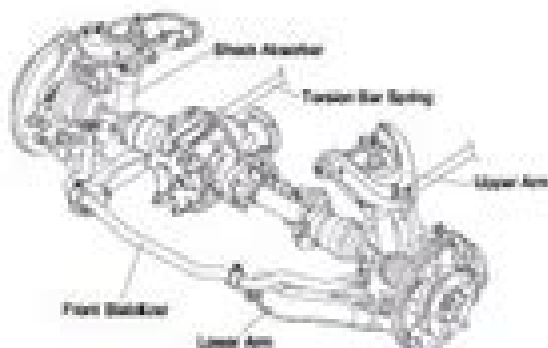

- The double wishbone suspension, which has A-shape lower arms, is used for the front suspension. A-shape lower arms have high rigidity and durability.
- The torsion bar springs are used for both 4x2 and 4x4 models.
- The torsion bar spring is pre-coiled in one direction. It therefore gives ample spring performance when installed correctly, but only half if installed in reverse. An R (right) or L (left) is marked on the rear end of the bar to distinguish one from the other. The left and right, and 4x2 and 4x4 torsion bar springs are not interchangeable.
