Handbook of Disciplinary and Regional Approaches to Peace Oliver Richmond, Sandra Pogodda, Jasmin

Ramovic, 2016-03-15 In this handbook a diverse range of leading scholars consider the social cultural economic political and developmental underpinnings of peace This handbook is a much needed response to the failures of contemporary peacebuilding missions and narrow disciplinary debates both of which have outlined the need for more interdisciplinary work in International Relations and Peace and Conflict studies Scholars students and policymakers are often disillusioned with universalist and northern dominated approaches and a better understanding of the variations of peace and its building blocks across different regions is required Collectively these chapters promote a more differentiated notion of peace employing comparative analysis to explain how peace is debated and contested Local and Regional Development Andy Pike, Andrés

Rodriguez-Pose, John Tomaney, 2016-07-15 Actors and institutions in localities and regions across the world are seeking prosperity and well being amidst tumultuous and disruptive shifts and transitions generated by an increasingly globalised knowledge intensive capitalism global financial instability volatility and crisis concerns about economic social and ecological sustainability climate change and resource shortages new multi actor and multi level systems of government and governance and a re ordering of the international political economy state austerity and retrenchment and new and reformed approaches to intervention policy and institutions for local and regional development Local and Regional Development provides an accessible critical and integrated examination of local and regional development theory institutions and policy in this changing context Amidst its rising importance the book addresses the fundamental issues of what kind of local and regional development and for whom its purposes principles and values frameworks of understanding approaches and interventions and integrated approaches to local and regional development throughout the world The approach provides a theoretically informed critical analysis of contemporary local and regional development in an international and multi disciplinary context grounded in concrete empirical analysis from experiences in the global North and South It concludes by identifying what might constitute holistic inclusive progressive and sustainable local and regional development and reflecting upon its limits and political renewal *The Northeast Question* Pradip Phanjoubam, 2015-12-14 This book explores the idea psychology and political geography of Northeast India as forged by two interrelated but autonomous meta narratives First the politics of conflict inherent in and therefore predetermined by physical geography and second the larger geopolitics that was unfolding during the colonial period Unravelling the history behind the turmoil engulfing Northeast India the study contends that certain geographies most pertinently fertile river valleys and surrounding mountains which feed the rivers are integral to nature and any effort to disrupt this cohesion will result in conflict It comprehensively traces the geopolitics of the region since colonial era in particular the Great Game the politics that went into the making of the McMahon Line the Radcliffe Line

and the Pemberton Line the region's relations with its international neighbours China Bhutan Myanmar Bangladesh and Nepal as well as the issue of many formerly non state bearing populations awakening to the reality of the modern state Lucid and analytical this book will be of great interest to scholars and researchers of Northeast India modern Indian history international relations defence and strategic studies and political science

Intergenerational Mobilities Lesley Murray, Susan Robertson, 2016-10-04 Drawing from work on mobilities and geographies of the lifecourse this collection is concerned with the ways in which age as a relational concept is constructed and played out in mobile urban space With studies of ageing and mobility often focusing on discrete age groups most notably children and older people this study seeks to fill a gap in existing literature by exploring mobility in relation to the lifecourse and generation looking not only at the margins Whilst some generations are increasingly mobile others are less so and this disparity in mobility opportunity is relational as age is relational This book addresses gaps in knowledge in relational geographies of ageing whilst contributing to literature on mobility and transport in particular the burgeoning field of mobility in justice Here mobility is considered in its broadest sense for example in relation to the movement or lack of movement of bodies and to computer mediated intergenerational communications Through focusing on urban mobile spaces from very local spaces of medical care to global spaces of migration that are the context for intergenerational mobilities this collection explores these interdependencies and considers ways in which intergenerational mobilities are conceptualised and researched

America Ascendant Stanley B. Greenberg, 2015-11-03 America is poised to lead the 21st Century as it led the 20th That will happen because the country is at a tipping point in the battle for its own renewal a renewal that will allow America to be exceptional again Our economy is on the move fueled by revolutions in energy immigration innovation big data and advanced manufacturing America's energy independence has set off shockwaves Just as important are the social transformations that are making the country ever more racially and culturally diverse younger a home to immigrants and the metropolitan centers that foster a rising economic and cultural dynamism While most other countries struggle profoundly with immigration and religious and racial differences America's on a path to multicultural identity Those revolutions in the economy society and culture and are also producing a new American majority that embraces new values and new politics Republicans are waging a counter revolution and that is why America looks gridlocked and why the country is turning to Democrats to take on the country's growing challenges The economic and social transformations leave people struggling to earn enough and reach the middle class Families are under stress Government is corrupted by big money The American public is demanding the country address the dark side of our progress and reforms are starting to happen That is why Democrats will get to lead an era of reform and renewal comparable to the progressive era that mitigated the excesses of the Industrial Revolution In this incisive book expert strategist Greenberg draws on years of research and polling to illuminate how America is far from being gridlocked and he articulates a powerful vision of how American politics and America can be renewed

Negotiating International Water Rights

Muserref Yetim, 2016-06-28 Transboundary watercourses account for an estimated 60 per cent of global freshwater flow and support the livelihoods of hundreds of millions of people worldwide Yet the indeterminate status of water rights in many international watercourses presents a problem and many attempts to resolve water rights issue have failed Knowing how and where negotiations fail is essential if successful resolution is to be achieved Muserref Yetim's important book seeks to illustrate a means to the peaceful resolution of natural resource based conflicts Through a detailed study of the Tigris Euphrates water conflict involving Turkey Syria and Iraq countries of vital security interest to the world at large the author clarifies the collective action dilemmas confronting Middle Eastern watercourses and reveals the bargaining bottlenecks where negotiations fail She develops an original framework that explains bargaining failures and proposes conditions for creating a new property rights regime among watercourse states that offers a route to governing their shared water resources in ways that are politically economically and environmentally sound In almost all water scarce regions international water resources are subject to intense unilateral exploitation in a highly competitive fashion And as demand for freshwater continues to increase through increasing urbanization and the continuing development of societies so the issue of how such shared water resources can best be governed is becoming vitally important Negotiating International Water Rights offers both a timely contribution to a matter of international concern and important insights into resource conflict in countries of vital security interest to the world at large [Geographical Data Science and Spatial Data Analysis](#) Lex
