have a strong historic bond with human civilization due to their status as the world's most charismatic birds. Conservation policies have also been successful in repopulating some ecosystems with breeding eagles. Therefore, despite the complexity of this relationship, there may yet be hope for this unique species group, frequently rated as the kings of birds and symbolic of human power, ambition, royalty, nationality, and even concepts of God. It is hoped that this book will contribute to the further understanding of these unique and fantastic birds. **Geographical Education Magazine**, 1996 **Housing, Fuel**

Poverty and Health Jonathan D. Healy, 2017-03-02 The first fully comparative study of fuel poverty across the EU, this work analyses the relationship between domestic energy efficiency, fuel poverty, and health. The book adopts a holistic approach, incorporating a large number of social and economic risk factors to present a large-scale cross-country longitudinal analysis. The book is unique in developing a new consensual methodology for calculating cross-country fuel poverty levels. Presenting a detailed econometric statistical analysis of EU fuel poverty, detailing the results of an empirical investigation of EU housing conditions, affordability, and housing satisfaction, identifying risk factors related to seasonal variations in mortality across the EU, offering an empirical examination of health outcomes associated with fuel poverty, providing startling new evidence on fuel poverty in Southern Europe, *Housing, Fuel Poverty and Health* provides a powerful reference source for researchers and practitioners in the areas of energy, economics, public health, and epidemiology, housing, and social policy. **Resources in**
