Uzbek State Marlene Laruelle, 2017-12-20 Over the past three decades Uzbekistan has attracted the attention of the academic and policy communities because of its geostrategic importance its critical role in shaping or unshaping Central Asia as a region its economic and trade potential and its demographic weight every other Central Asian being Uzbek Uzbekistan's political social and cultural evolutions largely exemplify the transformations of the region as a whole And yet more than 25 years after the collapse of the Soviet Union evaluating Uzbekistan's post Soviet transformation remains complicated Practitioners and scholars have seen access to sources data and fieldwork progressively restricted since the early 2000s The death of President Islam Karimov in power for a quarter of century in late 2016 reopened the future of the country offering it more room for evolution To better grasp the challenges facing post Karimov Uzbekistan this volume reviews nearly three decades of independence In the first part it discusses the political construct of Uzbekistan under Karimov based on the delineation between the state the elite and the people and the tight links between politics and economy The second section of the volume delves into the social and cultural changes related to labor migration and one specific trigger the difficulties to reform agriculture The third part explores the place of religion in Uzbekistan both at the state level and in society while the last part looks at the renegotiation of collective identities Organic Food and Farming in China Steffanie Scott, Zhenzhong Si, Theresa Schumilas, Aijuan Chen, 2018-10-03

Despite reports of food safety and quality scandals China has a rapidly expanding organic agriculture and food sector and there is a revolution in ecological food and ethical eating in China's cities This book shows how a set of social economic cultural and environmental conditions have converged to shape the development of a formal organic sector created by top down state developed standards and regulations and an informal organic sector created by bottom up grassroots struggles for safe healthy and sustainable food This is generating a new civil movement focused on ecological agriculture and quality food Organic movements and markets have typically emerged in industrialized food systems that are characterized by private land ownership declining small farm sectors consolidated farm to retail chains predominance of supermarket retail standards and laws to safeguard food safety and an active civil society sector The authors contrast this with the Chinese context with its unique version of capitalism with social characteristics collective farmland ownership and predominance of smallholder agriculture and emerging diverse marketing channels China's experience also reflects a commitment to domestic food security evolving food safety legislation and a civil society with limited autonomy from a semi authoritarian state that keeps shifting the terrain of what is permitted The book will be of great interest to advanced students and researchers of agricultural and food systems and policy as well as rural sociology and Chinese studies Growing Community Forests Ryan Bullock, Gayle Broad, Lynn Palmer, M.A. (Peggy) Smith, 2017-10-13 Canada is experiencing an unparalleled crisis involving forests and communities across the country While municipalities policy makers and industry leaders acknowledge common challenges such as an overdependence on US markets rising energy costs and lack of diversification no common set of solutions has been developed and implemented Ongoing and at

times contentious public debate has revealed an appetite and need for a fundamental rethinking of the relationships that link our communities governments industrial partners and forests towards a more sustainable future The creation of community forests is one path that promises to build resilience in forest communities and ecosystems This model provides local control over common forest lands in order to activate resource development opportunities benefits and social responsibilities Implementing community forestry in practice has proven to be a complex task however there are no road maps or well developed and widely tested models for community forestry in Canada But in settings where community forests have taken hold there is a rich and growing body of experience to draw on The contributors to *Growing Community Forests* include leading researchers practitioners Indigenous representatives government representatives local advocates and students who are actively engaged in sharing experiences resources and tools of significance to forest resource communities policy makers and industry

A University Education David Willetts, 2017 In *A University Education* David Willetts draws on his experience as Minister for Universities and Science from 2010 to 2014 as well as a broad spectrum of research and international comparisons to offer a powerful defence of the value of higher education in the world today If you want to read one book about our universities today then this is it Never one to shirk controversy either as a Minister or an author Mr Willetts combines a passionate advocacy of the value of a university education with a serious in depth knowledge of the higher education sector to present his vision of what our universities can offer us both now and in the future

Asia's Quest for Balance Jay L. Batongbacal, Elliot Brennan, Tetsuo Kotani, Evan A. Laksmana, Joseph Chinyong Liow, Hunter Marston, Rory

Medcalf, Sylvia Mishra, C. Raja Mohan, Prashanth Parameswaran, Tran Truong Thuy, Ha Anh Tuan, 2018-10-15 In recent years the narrative surrounding China's peaceful rise has given way to a more ominous story of friction, ambition and great power rivalry. As Chinese foreign policy has grown more nationalist and assertive, its intensifying competition with the U.S. has assumed center stage. The impact on China's neighbors, by contrast, and their evolving responses have received comparatively less attention. The Realist theory of international relations suggests the rapid accumulation of power by one nation state will prompt its neighbors and peers to adopt Balancing strategies. They will strive to enhance their internal defense capabilities and forge new external security partnerships to hedge against this potential new threat. Have these predictions rung true? Are key Indo-Pacific capitals balancing and drawing closer to the U.S. as insurance against Chinese aggression? Or is China a new breed of rising power challenging traditional theories of international relations in a newly globalized, economically interdependent world? In *Asia's Quest for Balance: China's Rise and Balancing in the Indo-Pacific*, leading author experts from Australia, India, Indonesia, Japan, Malaysia, Myanmar, the Philippines, Singapore and Vietnam explore these questions and more, decoding China's complex and evolving relationships with its neighbors and exploring how their responses are altering the security landscape of the region. Contributions by Jay L. Batongbacal, Elliot Brennan, Tetsuo Kotani, Evan A. Laksmana, Joseph Chinyong Liow, Hunter Marston, Rory Medcalf, Sylvia Mishra, C. Raja Mohan, Prashanth Parameswaran, Jeff M. Smith, Tran Truong Thuy and Ha Anh Tuan.

Places of Invention Arthur P. Molella, Anna Karvellas, 2015-09-15 The companion book to an upcoming museum exhibition of the same name, *Places of Invention* seeks to answer timely questions about the nature of invention and innovation. What is it about some places that sparks invention and innovation? Is it simply being at the right place at the right time, or is it more than that? How does place, whether physical, social or cultural, support, constrain and shape innovation? Why does invention flourish in one spot but struggle in another, even very similar location? In short, why there? Why then? *Places of Invention* frames current and historic conversation on the relationship between place and creativity, citing extensive scholarship in the area and two decades of investigation and study from the National Museum of American History's Lemelson Center for the Study of Invention and Innovation. The book is built around six place case studies: Hartford, CT (late 1800s), Hollywood, CA (1930s), Medical Alley, MN (1950s), Bronx, NY (1970s), Silicon Valley, CA (1970s-1980s) and Fort Collins, CO (2010s). Interspersed with these case studies are dispatches from three learning labs detailing Smithsonian Affiliate museums' work using *Places of Invention* as a model for documenting local invention and innovation. Written by exhibition curators, each part of the book focuses on the central thesis that invention is everywhere and fueled by unique combinations of creative people, ready resources and inspiring surroundings. Like the locations it explores, *Places of Invention* shows how the history of invention can be a transformative lens for understanding local history and cultivating creativity on scales of place ranging from the personal to the national and beyond.

Trees on Mars Hal Niedzviecki, 2015-10-20 The future is big, right now. For perhaps the first time, our society is more focused on what is going to happen in the future than what is happening right now.

In Trees on Mars Our Obsession with the Future cultural critic and indie entrepreneur Hal Niedzviecki asks how and when we started believing we could and should create the future What is it like to live in a society utterly focused on what is going to happen next Through visits to colleges corporations tech conferences factories and more Niedzviecki traces the story of how owning the future has become irresistible to us In deep conversation with both the beneficiaries and victims of our relentless obsession with the future Niedzviecki asks crucial questions Where are we actually heading How will we get there And whom may we be leaving behind Immiserizing Growth Paul Shaffer,Ravi Kanbur,Richard Sandbrook,2019-01-10 Immiserizing growth occurs when growth fails to benefit or harms those at the bottom It is not a new concept appearing in some of the towering figures of the classical tradition of political economy including Malthus Ricardo and Marx It is also not empirically insignificant occurring in between 10% and 35% of cases In spite of this it has not received its due attention in the academic literature dominated by the prevailing narrative that growth is good for the poor Immiserizing Growth When Growth Fails the Poor challenges this view to arrive at a better understanding of when why and how growth fails the poor Taking a diverse disciplinary perspective Immiserizing Growth combines discussion of mechanisms of this troubling economic phenomenon with empirical data on trends in growth poverty and related welfare indicators It draws on political economy applied social anthropology and development studies including contributions from experts in these fields A number of methodological approaches are represented including statistical analysis of household survey and cross country data detailed ethnographic work and case study analysis drawing on secondary data Geographical coverage is wide including Bolivia the Dominican Republic Ecuador India Indonesia Mexico Nigeria the People s Republic of China Singapore and South Korea in addition to cross country analysis This volume is the first full length treatment of immiserizing growth and constitutes an important step in redirecting attention to this major challenge Handbook on the Geographies of Money and Finance Ron Martin,Jane Pollard,2017-03-31 The aim of this timely work which appears in the wake of the worst global financial crisis since the late 1920s is to bring together high quality research based contributions from leading international scholars involved in constructing a geographical perspective on money Topics covered include the crisis the spatial circuits of finance regulation mainstream financial markets banking equity etc through to the various alternative and disruptive forms of money that have arisen in recent years It will be of interest to geographers political scientists sociologists economists planners and all those interested in how money shapes and reshapes socio economic space and conditions local and regional development
