risk reduction crowdsourcing humanitarian data online education and ICT based medical technologies can have significant social impact The book brings together the best papers of the 2016 International Conference on Technologies for Development at EPFL Switzerland The book explores how the gap between innovation in the global South and actual social impact can be bridged It fosters exchange between engineers other scientists practitioners and policy makers active at the interface of innovation and technology and human social and economic development

**The UK Regional-National Economic Problem** Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain's regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

**The Changing Wealth of Nations 2021** World Bank, 2022-01-26 It is now clear that a narrow focus on the growth of gross domestic product GDP is insufficient to achieve humanity's aspirations for sustainable prosperity Well functioning ecosystems and educated populations are requisites for sustainable well being These and other too often neglected ingredients of national wealth must be addressed if the development path is to be sustainable The Changing Wealth of Nations 2021 Managing Assets for the Future provides the most comprehensive accounting of the wealth of nations an in depth analysis of the evolution of wealth and pathways to build wealth for the future This report and the accompanying global database firmly establishes comprehensive wealth as a measure of sustainability and a key component of country analytics It expands the coverage of wealth accounts and improves our understanding of the quality of all assets notably natural capital Wealth the stock of produced natural and human capital is measured as the sum of assets that yield a stream of benefits over time Changes in the wealth of nations matter because they reflect the change in countries assets that underpin future income Countries regularly track GDP as an indicator of their economic progress but not wealth and national

wealth has a more direct and long term impact on people s lives This report provides a new set of tools and analysis to help policy makers navigate risks and to guide collective action Wealth accounts can be applied in macroeconomic analysis to areas of major policy concern such as climate change and natural resource management This report can be used to look beyond GDP to gauge nations economic well being and to promote sustainable prosperity
