Smallman-Raynor,Andrew D. Cliff,J. Keith Ord,Peter Haggett,2022-02-10 The last half century has witnessed two landmark events in medical history The 1970s saw euphoria about the defeat of one of humankind s oldest disease scourges with the global eradication of smallpox To set against this the 2020s are experiencing the pandemic ravages of new viral diseases of which COVID 19 is currently the most potent But it is only the latest of a succession of threats A Geography of Infection explores the distinctive spatial patterns and processes by which such infectious diseases spread from place to place and can grow from local and regional epidemics into global pandemics This resource focuses initially on the local scale of doctors practices and small islands where epidemic outbreaks are slight in the numbers infected and in geographical extent Such local area studies raise two questions First how and

where do epidemic diseases emerge and second why do more diseases appear to be emerging now To approach such questions implies a shift in spatial gear from painting epidemics with a fine tipped local brush to an expanded palette on which doctors practices and small islands are replaced by regional and global populations Simultaneously time bands are extended backwards to the origins of civilization and forwards into the twenty first century It eventually leads to a consideration of global pandemics both historical for example plague cholera and influenza and contemporary HIV AIDS and COVID 19 and examines the ways the spread of infection can be prevented All chapters are extensively illustrated with full colour diagrams and maps some of which are in colour for the first time Bringing together the authors collective 150 years of experience in research mapping and writing on spatial aspects of medical history this is an invaluable resource for anyone interested in the spread control and eradication of epidemic and pandemic diseases

iTake-Over David Arditi, 2014-12-11
iTake Over The Recording Industry in the Digital Era sheds light on the way large corporations appropriate new technologies related to recording and distribution of audio material to maintain their market dominance in a capitalist system All too commonly scholars have asserted too confidently how the rise and reign of digital music has diminished the power of major record labels In iTake Over music scholar David Arditi argues otherwise adopting a broader perspective by examining how the recording industry has strengthened copyright laws for their corporate ends at the expense of the broader public good which has traditionally depended on the safe harbor of fair use Arditi also challenges the dominant discourse over digital music distribution which has largely adopted the position that the recording industry has a legitimate claim to profitability at the detriment of a shared culture iTake Over more specifically surveys the actual material effects that digital distribution has had on the industry Most notable among these is how major record labels find themselves in a stronger financial position today in the music industry than they were before the launch of Napster Arditi contends that this is largely because of reduced production and distribution costs and the steady gain in digital music sales Moreover instead of merely trying to counteract the phenomenon of digital distribution the RIAA and the major record labels embraced and then altered the distribution system Throughout the 1990s and early 2000s the RIAA lobbied for legislation built technologies and waged war in the courts in order to shape the digital environment for music distribution From mp3s to the Digital Millennium Copyright Act DMCA from the Audio Home Recording Act AHRA to iTunes the major record labels and the RIAA instead of trying to torpedo the switch to digital distribution engineered it to their benefit often at the expense of the public interest Throughout Arditi boldly asserts that the sea change to digital music did not destroy the recording industry Rather it stands as a testament to the recording industry s successful management of this migration to digital production and distribution As such this work should appeal to musicians and music scholars political scientists and sociologists technologists and audio professionals seeking to grasp this remarkable change in music production and consumption

Elastic Empire Lisa Bhungalia, 2023-12-12 The United States integrated counterterrorism mandates into its aid flows in the West Bank and Gaza Strip during the early years of the global war on terror Some two decades later this securitized model of aid has become normalized across donor intervention in Palestine Elastic Empire traces how foreign aid on which much of the Palestinian population is dependent has multiplied the sites and means through which Palestinian life is regulated surveilled and policed this book tells the story of how aid has also become war Drawing on extensive research conducted in Palestine Elastic Empire offers a novel accounting of the US security state The US war chronicled here is not one of tanks grenades and guns but a quieter one waged through the interlacing of aid and law It emerges in the infrastructures of daily life in a greenhouse and library in the collection of personal information and mapping of land plots in the halls of municipal councils and in local elections and indelibly transfigures lives Situated in a landscape where the lines between humanitarianism and the global war on terror are increasingly blurred Elastic Empire reveals the shape shifting nature of contemporary imperial formations their realignments and reformulations their haunted sites and their obscured but intimate forms

Protests as Events Ian R Lamond, Karl Spracklen, 2014-11-05 Can activism be considered a leisure activity Can the Occupy movement local campaigns for change and lone acts of personal resistance be understood as events Within the field of Events Management the content of events is generally analyzed within three categories culture sport or business Such a typology can be helpful as a heuristic for interpretation and analysis within a commercial paradigm However this framework overlooks and depoliticizes a significant variety of events those more accurately construed as protest Protests as Events is the first book to explore activism as a leisure activity and protests as events using a fresh interpretation of event to develop a new critical politics of events and leisure Bringing together a range of cutting edge research from around the world it explores a variety of protests through the lens of events studies and leisure in order to understand how the study of events management might be conceptualized in the protest space

'Is It Global War on Terrorism' or Global War over Terra Africana? Nkwazi Nkuzi Mhango, 2017-12-06 Global War on Terrorism or Global War over Terra Africana How Imperial Powers Seek to Occupy Africa Militarily is a long onerous academic voyage of the demystification and demythologization of the Global War on Terror former US president George W Bush and former UK premier Tony Blair conceived envisaged and declared for their hidden personal and national interests It is a hidden and untold story of the other side about the GWOT which is but the GWOTA Major arguments presented gyrate around the deconstruction and overhaul of the GWOT so that it can be equally formulated and fought by all nations for the interests of all but not the interests of some as it currently is Also the book repudiates the pontification the pontifices maximus of the GWOTA have always made ex nihilo while concealing their drive s for perpetually exploiting poor countries Terrorism is a world phenomenon everybody must fight provided it is collectively agreed decided and declared for the collective good and interests of the world but not the interests of a few hegemonic countries that usurped the power of declaring who is a terrorist and who is not Although terrorism is real the manner it is fought is a little bit knotty This tome acts as an eye opener and a wake up call for Africa to start interrogating and excavating the hidden truths about the GWOT chiefly the way it was enacted declared presented and now fought with essentialist and controversialist modus operandi and rationale Other major questions asked and answered are Why exporting military and military hardware guised as fighting terrorism without underscoring the terror military incursion will inter alia cause to Africa especially If truly the aim of the GWOT is to wage war on terror why doesn t the West want to empower African armies Why did the US appoint itself to lead the war conceived and declared without meeting the requirements of the just war or international standards Why hasn t the world learned from Iraq and Libya whose governments were toppled under the fa ade of the GWOT Is it the GWOT or the GWOTA

Audretsch,2015-03-02

Every city region and state wants to do better or at the very least not do worse Places have a strong and vigorous concern with and stake in generating a stronger economic performance This concern spans a broad spectrum of constituents and interests including business labor non profit organizations government and private residents However such decision makers mandated with the strategic management of their place receive little guidance or insight from scholars in terms of a systematic framework for evaluating how to generate and sustain a competitive advantage for their place While an entire academic field exists devoted to analyzing how firms and organizations can create and sustain a competitive advantage and ultimately a strong economic performance the field of strategic management in business schools no such analogous field exists which is devoted to guiding and informing decision makers mandated and concerned with the strategic management of their place Everything in Its Place seeks to fill this intellectual void explaining the underlying economic and social factors and the broad spectrum of policies and instruments that can actually influence and enhance economic performance in places Several academic fields have generated a number of

important theories empirical findings and case studies that shed considerable light on identifying and unraveling the underlying forces about what shapes this economic performance Combined in this book with the actual experiences and instincts garnered from practitioners and policy makers these insights are integrated together in into a coherent inclusive framework to guide and inform thought leaders and scholars in the strategic management of places Entrepreneurship, Business and Economics - Vol. 2 Mehmet Huseyin Bilgin,Hakan Danis,2016-03-23 This volume of Eurasian Studies in Business and Economics focuses on latest results from research in Banking and Finance Accounting and Corporate Governance Growth and Development along with a focus on the Energy sector The first part on Accounting and Corporate Governance features articles on environmental accounting audit quality financial information and adoption of governance principles The Banking and Finance part looks at risk behavior in banks credit ratings during subprime crisis stakeholder management and stock market crises The book focuses then on the energy sector and analyzes macroeconomic impacts of electricity generation risk dimensions in wind energy the latest EU energy reforms and discusses prediction models

Where Do Cities Come From and Where Are They Going To? Modelling Past and Present Agglomerations to Understand Urban Ways of Life Francesca Fulminante,John William Hanson,Scott G. Ortman,Luis M. A. Bettencourt,2021-01-25 Over the last decade there has been a surge of interest in urbanization and economic development sparked by the realization that making urban life sustainable is one of the greatest challenges facing us in the 21st century this is now one of the core sustainable development goals of the United Nations This has exerted considerable pressure on researchers to come up with more scientific ways of studying urbanism and economic activity over the long run which has resulted not only in the development of new theoretical frameworks but also in the collection of vast amounts of data from a range of settings This has led to the realization that although there are significant differences between settlements in different settings there are nonetheless important regularities and commonalities between a diverse group of settlements in range of geographical and historical contexts including both ancient and modern ones This suggests that a common feature of settlements is their ability to generate increased social connectivity greater division of labour and specialization and enhanced technological invention and innovation albeit with costs to levels of equality quality of life and standards of living as well as impacts on the environment which cannot be separated from the emergence of confederations and states and the creation of settlement systems hierarchies and networks We believe that this field of enquiry now stands at a critical juncture Although it is now feasible to talk about many aspects of ancient and modern urbanism with relative confidence such as the numbers of cities or their sizes much of the discussion of these themes within historical and archaeological circles has been on a discursive or qualitative level while it is often difficult to harmonize the different models that have been applied to date into a consistent empirical and theoretical framework A new approach to settlements throughout different contexts should now be within our grasp however thanks to both the ease with which information can be disseminated and the facilities that recent

developments in IT offer us to model analyse and statistically test data Mountains: Physical, Human-Environmental, and Sociocultural Dynamics Mark A. Fonstad, 2018-12-07 Mountains have captured the interests and passions of people for thousands of years Today millions of people live within mountain regions and mountain regions are often areas of accelerated environmental change This edited volume highlights new understanding of mountain environments and mountain peoples around the world The understanding of mountain environments and peoples has been a focus of individual researchers for centuries more recently the interest in mountain regions among researchers has been growing rapidly The articles contained within are from a wide spectrum of researchers from different parts of the world who address physical political theoretical social empirical environmental methodological and economic issues focused on the geography of mountains and their inhabitants The articles in this special issue are organized into three themed sections with very loose boundaries between themes 1 physical dynamics of mountain environments 2 coupled human physical dynamics and 3 sociocultural dynamics in mountain regions This book was first published as a special issue of the Annals of the American Association of Geographers

Supermarket Retailing in Africa Felix Adamu Nandonde, John L. Stanton, 2022-03-25 This book surveys the landscape of supermarket retailing in Africa showing how this expanding part of the retail sector is changing consumerism on the continent Drawing on research covering retail formats consumer behaviour strategies operation research ICT relationship marketing and market linkage the book investigates the many factors impacting the growth of supermarkets in Africa The contributors employ theories concepts and methods in order to help us to understand changing consumer behaviour the strategies used by suppliers to access supermarkets the role of service suppliers in the growth of the sector and ultimately how supermarkets can assist in making the market linkage between producers and consumers in Africa The chapters provide a comprehensive exploration of modern retail discussing its growth and future identifying consumer preferences as well as suggesting solutions to the challenges that retailers and suppliers on the continent face in developing the sector This book will be of interest to scholars and students of the retail sector and retail management in Africa *The Principle of Systemic Integration in International Law* Campbell McLachlan KC, 2024-06-24 International law has greatly expanded in reach and density over the past few decades and its fragmented and decentralized nature is causing anxiety among those who need to resolve legal dilemmas in a system that lacks vertical hierarchy Although the principle of systemic integration is embodied in Article 31 3 c of the Vienna Convention 1969 its operation and significance has not been fully assessed The Principle of Systemic Integration in International Law fills this research gap by analysing the manner in which the principle has been applied in the judicial decisions of international courts and tribunals together with the practice of states and international organizations in the framing of international instruments and their application Building upon the framework he first pioneered in 2005 and the culmination of two decades of academic research and practical experience in international law the author Campbell McLachlan KC closely examines legislative texts and cases to reflect on the principle s theoretical

foundations and actual application in practice The book argues that the principle of systemic integration contributes to an orderly framework within which conflicts between institutions and between legal norms may be addressed It explores how disparate parts of international law are integrated in the development of bilateral and multilateral treaties and finally analyses the operation of the principle in international courts and tribunals The reasoning and larger questions presented by the book will bring fresh insights to researchers and practitioners undertaking any international law project Trading Justice for Peace? Sigríður Guðmarsdóttir, Paulette Regan, Demaine Solomons, 2022-03-01 Conflict in its various manifestations continues to be a defining feature in many places throughout the world In an attempt to address such conflict various forms of a Truth and Reconciliation Commission TRC have been introduced to facilitate the transition from social conflict to a new dispensation The introduction and subsequent proceedings of TRCs in South Africa Canada and Norway are widely regarded as good examples of this approach Against this background a number of researchers from VID Specialized University and the University of the Western Cape had an exploratory meeting in Oslo in 2018 where the possibility for a joint research project under the broad theme of discourses on reconciliation was first discussed This led to two further research symposia in Cape Town and Troms in 2019 With the inclusion of specialists working on the Canadian Truth and Reconciliation process these meetings demonstrated common ground and a shared understanding of the issues at stake Moreover it pointed to the differences between the South African Canadian and Norwegian Commissions In comparing the South African Canadian and Norwegian experiences researchers identified that these countries were in fact at different stages of their respective truth and reconciliation processes This has prompted scholars to revisit and problematise these processes in relation to ongoing societal challenges In all cases it is quite apparent that reconciliation between individuals and groups remains a significant challenge
