on a large scale international study of teachers in Los Angeles Chicago Ontario and New York this book illustrates the ways increased use of high stakes standardized testing is fundamentally changing education in the US and Canada with a negative overall impact on the way teachers teach and students learn Standardized testing makes understanding students strengths and weaknesses more difficult and class time spent on testing consumes scarce time and attention needed to support the success of all students further disadvantaging ELLs students with exceptionalities low income and racially minoritized students **Most Likely to Succeed** Tony Wagner, Ted Dintersmith, 2015-08-18 An urgent call for the radical re imagining

and contrast the values of such an education with the other important objective of schools and colleges which is to prepare students with appropriate occupational training The book will highlight the arguments of both points of view In doing so attention will be paid to the contributions to society of those who have been exposed to a variety of educational curricula As part of the study the impact of the community college will be considered along with the impact of recent initiatives such as the Nation at Risk Report No Child Left Behind Race to the Top and the Common Core Finally the text will conclude with an attempt to suggest the direction that will determine the fate of liberal arts in schools and colleges

Bounded Rationality in Decision Making Under Uncertainty: Towards Optimal Granularity Joe Lorkowski, Vladik Kreinovich, 2017-07-01 This book addresses an intriguing question are our decisions rational It explains seemingly irrational human decision making behavior by taking into account our limited ability to process information It also shows with several examples that optimization under granularity restriction leads to observed human decision making Drawing on the Nobel prize winning studies by Kahneman and Tversky researchers have found many examples of seemingly irrational decisions e g we overestimate the probability of rare events Our explanation is that since human abilities to process information are limited we operate not with the exact values of relevant quantities but with granules that contain these values We show that optimization under such granularity indeed leads to observed human behavior In particular for the first time we explain the mysterious empirical dependence of betting odds on actual probabilities This book can be recommended to all students interested in human decision making to researchers whose work involves human decisions and to practitioners who design and employ systems involving human decision making so that they can better utilize our ability to make decisions under uncertainty

On My Own Xueli Wang, 2021-02-18 2020 ASHE Council for the Advancement of Higher Education Programs CAHEP Barbara Townsend Lecture Award 2021 Transfer Champion Catalyst Award from the National Institute for the Study of Transfer Students NISTS 2021 Outstanding Publication Award AERA Division J Publication and Research On My Own The Challenge and Promise of Building Equitable STEM Transfer Pathways is the first book of its kind to provide a detailed on the ground examination of the difficult paths curricular interpersonal and institutional that students must chart through community college The book follows 1 670 two year college students over four years as they begin STEM programs in the Midwest and documents their educational and life experiences as they moved toward or away from the prospect of transfer to a four year institution Their stories reveal that they were on their own left to navigate the pathways to transfer without meaningful institutional support The students pursued one of four pathways or momentum trajectories linear upward detoured deferred or taking a break The preexisting and lasting disparities in their access to education and financial resources their experiences with teaching and advising and the conundrum between support from and for family among others propelled them onto different trajectories in their quest for transfer As this book makes painfully clear the current state of transfer acts as a mechanism that perpetuates and worsens inequities in educational outcomes As Xueli Wang argues to cultivate an equitable STEM transfer pathway

culturally relevant and responsive supports that are accessible welcoming and validating must be put in place at the institutional level and appeal to the talent motivation and unique needs of historically marginalized students In doing so postsecondary institutions will be better positioned to fulfill their promise as an equitable pathway to bachelor s degrees and beyond
