Research and Debate in Primary Geography Simon Catling, 2017-10-02 This book brings together recent papers which make important contributions to understanding and developing primary geography. It considers primary teachers and trainee teachers' knowledge of geography, how the primary curriculum uses geography, teachers' planning of geography teaching, the way in which aspects of geography are taught, what high quality geography might look like, and children's geographical understanding and voices. Though geography curricula change quite often in countries around the world, the core matters noted above remain of constant and vital importance. The papers in this book either concern research with primary teachers and children or consider key concerns in primary geography, providing important perspectives for thinking about future developments in geography teaching and curriculum initiatives in primary schools. This is a stimulating and enticing collection written by leading exponents of and experts in primary geography education. This book was originally published as a special issue of *Education* 3:13.

Spationomy Vít Pászto, Carsten Jürgens, Polona Tominc, Jaroslav Burian, 2019-11-06 This open access book is based on Spationomy: Spatial Exploration of Economic Data, an interdisciplinary and international project in the frame of ERASMUS funded by the European Union. The project aims to exchange interdisciplinary knowledge in the fields of economics and geomatics. For the newly introduced courses, interdisciplinary learning materials have been developed by a team of lecturers from four different universities in three countries. In a first study block, students were taught methods from the two main research fields. Afterwards, the knowledge gained had to be applied in a project. For this international project, teams were formed consisting of one student from each university participating in the project. The achieved results were presented in a summer school a few months later. At this event, more methodological knowledge was imparted to prepare students for a final simulation game about spatial and economic decision making. In a broader sense, the chapters will present the methodological background of the project, give case studies, and show how visualisation and the simulation game works.

The New Urban Crisis Richard Florida, 2017-04-11 In recent years, the young, educated, and affluent have surged back into cities, reversing decades of suburban flight and urban decline. And yet, all is not well. Richard Florida argues in *The New Urban Crisis*, Florida, one of the first scholars to anticipate this back-to-the-city movement in his groundbreaking *The Rise of the Creative Class*, demonstrates how the same forces that power the growth of the world's superstar cities also generate their vexing challenges: gentrification, unaffordability, segregation, and inequality. Meanwhile, many more cities still stagnate, and middle-class neighborhoods everywhere are disappearing. Our winner-take-all cities are just one manifestation of a profound crisis in today's urbanized knowledge economy. A bracingly original work of research and analysis, *The New Urban Crisis* offers a compelling diagnosis of our economic ills and a bold prescription for more inclusive cities capable of ensuring growth and prosperity for all.

The Rise and Fall of Civic Education Michael Learn,2024-09-16 Social studies is a field in crisis The crisis stems from failure to establish the very foundation of social studies purpose in public education civic education Social studies advocates have never put forth a coherent method for teaching civic education because policymakers and the public have been unable to agree upon a general definition of civic education This issue has disrupted the field since the early days As educators sought to include civic education within public schools as a dedicated field social studies evolved into a blending of history social sciences and civic education Social studies evolution never resolved the differences between the three with each discipline striving to control the narrative Instead of creating a unified field the disciplines devalued social studies and thus any discipline associated with it The Rise and Fall of Civic Education The Battle for Social Studies in a Shifting Historical Landscape investigates the changing definitions and purposes ascribed to social studies in the United States through time This result is viewed through

the rising tensions from culture wars as America's divisive politics fight to control the narrative of the disciplines within social studies
