Green Journal Authors Instructions

Annette K. Griffith, Tyler C. Ré

Green Journal Authors Instructions:

The Green Journal Roy M. Pitkin, 2003 Commemorating the 50th anniversary of ACOG's premier journal Obstetrics Gynecology this book chronicles the history of the journal and the landmarks presented in it [A Compilation of Journal Instructions to Authors](#) National Cancer Institute (U.S.), 1979 *Knowing What Works in Health Care* Institute of Medicine, Board on Health Care Services, Committee on Reviewing Evidence to Identify Highly Effective Clinical Services, 2008-04-29 There is currently heightened interest in optimizing health care through the generation of new knowledge on the effectiveness of health care services The United States must substantially strengthen its capacity for assessing evidence on what is known and not known about what works in health care Even the most sophisticated clinicians and consumers struggle to learn which care is appropriate and under what circumstances *Knowing What Works in Health Care* looks at the three fundamental health care issues in the United States setting priorities for evidence assessment assessing evidence systematic review and developing evidence based clinical practice guidelines and how each of these contributes to the end goal of effective practical health care systems This book provides an overall vision and roadmap for improving how the nation uses scientific evidence to identify the most effective clinical services *Knowing What Works in Health Care* gives private and public sector firms consumers health care professionals benefit administrators and others the authoritative independent information required for making essential informed health care decisions [Fraud and Misconduct in Biomedical Research](#), 4th edition Frank Wells, Michael Farthing, 2019-03-14 Now in its fourth edition *Fraud and Misconduct in Biomedical Research* boasts an impressive list of contributors from around the globe and introduces a new focus for the book transforming it from a series of monographs into a publication that will quickly become an essential textbook on all areas of research fraud and misconduct Key features include [How to Write and Publish a Scientific Paper](#) Barbara Gastel, Robert A. Day, 2022-06-30 Thoroughly updated throughout this classic practical text on how to write and publish a scientific paper takes its own advice to be as clear and simple as possible The purpose of scientific writing according to Barbara Gastel and Robert A Day is to communicate new scientific findings Science is simply too important to be communicated in anything other than words of certain meaning This clear beautifully written and often funny text is a must have for anyone who needs to communicate scientific information whether they're writing for a professor other scientists or the general public The thoughtfully revised 9th edition retains the most important material including preparing text and graphics publishing papers and other types of writing and plenty of information on writing style while adding up to date advice on copyright presenting online identifying authors creating visual abstracts and writing in English as a non native language A set of valuable appendixes provide ready reference including words and expressions to avoid SI prefixes a list of helpful websites and a glossary Students and working scientists will want to keep *How to Write and Publish a Scientific Paper* at their desks and refer to it at every stage of writing and publication **Disseminating Behavioral Research**

Annette K. Griffith, Tyler C. Ré, 2023-12-09 Dissemination is a key component of the research process While several fields have developed resources dedicated to training and supporting their scientists and practitioners as they are encouraged to disseminate within their fields and to the larger public audience there has been a lack of formal guidance for dissemination within the behavioral sciences Disseminating Behavioral Science aims to fill that gap providing guidance across modalities for topics ranging from the peer review process to conference presentation to nontraditional avenues for dissemination The contents of this edited text divided across six sections serves as a roadmap for students junior researchers and senior scholars The first section includes types of academic scholarship types of dissemination and strategies to ensure ethical dissemination The second reviews traditional publication preparation including tips for the writing process and key components to include in each section of a scientific manuscript Section Three explores publication within a traditional peer reviewed journal Section Four outlines additional strategies to get research publicly recognized through conference presentations social media and popular media sources and white and grey literature Sections Five and Six offer a consolidated glossary of all key terms in the text and combined reference list
