Types of Maps

Topographic maps = show contour lines of elevation

- Reference maps** = show general information about places and their boundaries
- Thematic maps** = show density and distribution of quantitative data

choropleth maps = use colors and shading to represent quantitative data

excellent at showing density and its distribution

dot distribution maps = uses dots with specific values or approximate locations

used to show distribution (cluster/spread?)

graduated symbol maps = uses symbols of different sizes to represent values

used to show quantitative data and differences between areas

isoline maps = uses lines to connect points of equal value to depict variations in data

help recognize patterns of relationships between area's geography and data

cartograms = sizes of shapes are proportional to data being measured
used to display the emphasis of how present a feature is

flow line maps = express directions of geographic movement

display migration patterns well
