The Routledge Companion to International Hospitality Management Marco A. Gardini, Michael C. Ottenbacher, Markus Schuckert, 2020-11-09

The hospitality sector is facing increasing competition and complexity over recent decades in its development towards a global industry. The strategic response to this is still that hospitality companies try to grow outside their traditional territories and domestic markets while the expansion patterns and M&A activities of international hotel and restaurant chains reflect this phenomenon. Yet interestingly the strategies, concepts, and methods of internationalization as well as the managerial and organizational challenges and impacts of globalizing the hospitality business are under-researched in this industry. While the mainstream research on international management offers an abundance of information and knowledge on topics, players, trends, concepts, frameworks, or methodologies, its ability to produce viable insights for the hospitality industry is limited as the mainstream research is taking place outside of the service sector. Specific research directions and related cases like the international dimensions of strategy, organization, marketing, sales, staffing, control, culture, and others to the hospitality industry are rarely identifiable so far. The core rationale of this book is therefore to present newest insights from research and industry in the field of international hospitality, drawing together recent scientific knowledge and state-of-the-art expertise to suggest directions for future work. It is designed to raise awareness on the international factors influencing the strategy and performance of hospitality organizations while analyzing and discussing the present and future challenges for hospitality firms going or being international. This book will provide a comprehensive overview and deeper understanding of trends and issues to researchers, practitioners, and students by showing how to master current and future challenges when entering and competing in the global hospitality industry.

Disruptive Artificial Intelligence and Sustainable Human Resource Management Anamika Pandey, Balamurugan Balusamy, Naveen Chilamkurti, 2023-12-14

It is well established that every organization is founded with a specific purpose and goals. Virtually all business organizations obtain measurements and metrics dealing with outcomes and results. However, what is reflected on the balance sheet does not necessarily show the actual worth of the organizations and ensure their

survival and sustainability Thus the question arises what exactly makes the organizations sustainable and thriving in an ever changing environment There are several examples of companies like Faber Castell Bank of Ireland Chivas DuPont and many more which have been able to sustain and survive over more than 200 years and still have a successful existence in the present era Thus it is important for the organization to pay equal attention to its three bottom lines i e people profit and planet for its sustainability which not only meet the needs of the present generation but should have a futuristic approach as well In the present era organizations are adopting a new normal working dynamic and coping with the post pandemic situations to sustain themselves in the business environment Technology plays a significant role in this new working dynamic and cutting edge technologies like machine learning artificial intelligence blockchain ChatGPT Internet of Things and much more effectively facilitate human functioning at work The book aims to contribute to understanding and developing sustainable human resource management processes and practices aligned with recent technologies It highlights the interconnection among the three bottom line sustainable approaches for the growth and development of the organization Topics discussed in this book include Disruptive Technologies and HR Sustainability Convergence of Innovative Technologies HR and Organizational Growth Triple bottom line Sustainability for HRM Business oriented Talent analytics and HR Sustainability Role of Leadership in sustainable HRM practices
