technology a variety of environmentally friendly products have been introduced in the market and hybrid vehicle is highly recommended. However, in Malaysia, automotive market demand for hybrid vehicle is still considered very low compared to non-hybrid vehicles and thus to conduct a study on consumer's adoption toward hybrid car is timely. The study investigated the relationships between marketing mix 4Ps, environmental concern, governmental incentive, and purchase intention of hybrid car in Malaysia. A total of 372 valid samples were collected using convenience sampling technique. The Structural Equation Modelling (SEM) by using Smart PLS was employed to investigate the significance of individual path correlations, measurement model, and overall fit of structural model. The results of the study revealed that marketing mix 4Ps, governmental incentive, attitude, subject norm, and perceived behavioural control showed a significant and positive relationship with hybrid car purchase intention. In addition, environmental concern exhibits the moderation effect among those relationships.
