

An Analysis of EIA Report of the Second International Airport Project, Nepal

Shree Govind Shah

Abstract: Environmental Impact Assessment (EIA) is a planning tool which enables decision makers to accept environmentally friendly projects and reject environment damaging projects or their certain components. EIA has been mandatory in Nepal since the enactment of Environment Protection Act in 1997. Usually in Nepal, EIA is done for a project late in the project cycle after many important decisions on design and locations have already been made. While in case of government sponsored projects, EIA has remained as 'pro forma' compliance with government's legal requirements. This paper analyses outputs of approved EIA of a mega infrastructure project "Second International Airport Project" which government wants to implement despite of protests by conservationists, and environmental and social activists. There are technocratic problems in EIA Report such as informational weaknesses, insufficient analysis of impacts, and inadequately proposed mitigations measures. It indicates political influence on EIA. This paper suggests making policy decision on size and nature of an international airport and its facilities, alternative locations avoiding ecologically sensitive area, and source of funding. It proposes to conduct a comprehensive Environmental and Social Impact Assessment (ESIA) complying with national and international environmental and social safeguards, before making any decision to fell trees.

Keywords: Ecosystem services, pro Forma, technocratic problems, buffer zone, endangered, national park, livelihoods, replacement, compensatory plantation, biodiversity, conservation, Nepal

BACKGROUND

Government of Nepal is planning to construct International Civil Aviation Organization (ICAO) standard, Second International Airport. A prefeasibility study conducted in 1995 identified 8 sites and the feasibility study in 1997 selected the present site in Kohalbi Municipality (GEOCE, 2018). The then Ministry of Environment on 10 February 2011, approved Terms of Reference (TOR) for Environmental Impact Assessment (EIA) study as required by government legislation. Ministry of Culture, Tourism and Civil Aviation (MoCTA) is the responsible government agency, the proponent to construct and operate the airport.

The Nepalese Consulting firm GEOCE Consultants (P) Ltd., located in Lalitpur, Nepal prepared EIA Report of the Second International Airport Project (SIAP) for the proponent MoCTA in March 2018 based on given TOR and following procedures of Environment Protection Rules (1997) of Government of Nepal and MoCTA submitted the EIA Report with recommendation for approval to the Ministry of Forests and Environment (MoFE), the latter approved the submitted EIA Report for its implementation on 23 May 2018 (KP, 2018).

Some environmental, conservation and social activists have been publicly expressing their worries and campaigning against the felling of about 2.4 million trees that would have a significant adverse impact on forest ecology, wildlife and ecosystem services, and asked the government to block the project on environmental ground and select another site for SIAP (THT, Sept 2018, Hakahaki, Sept 2018, Rai June 2018 & others). However, the Proponent MoCTA is determined to construct the airport and has requested the MoFE to approve felling

of about 0.8 million trees in the first phase as per the approved EIA Report (Hakahaki, Sept 2018).

EIA is a project-planning and decision-making instrument which facilitates decision makers to accept environment friendly projects and reject environmentally damaging projects or their certain components (Robinson, 1992; IALA, 1995; Hironaka, 2002). Effects of EIA on projects have been very weak and have played only limited role in project approval and design decisions; it has remained as 'pro forma' compliance with legal requirements (IALA, 1995; Cashmore et al, 2004). Politically motivated EIAs are becoming common in developing countries. Decisions are often skewed towards non-environmental values. However, there are examples of significantly influencing decision-making process such as withdrawal of environmentally unsound projects, faulty locations etc. or even blockage of projects (van de Grondane, 1994; Devlin JF and Nomita TY, 2008). In Nepal, there is no such example of a blocked project due to EIA.

This paper is a technical evaluation of the Environment Impact Assessment (EIA) Report of the Second International Airport Project (SIAP) prepared by the Proponent MoCTA and approved for implementation by MoFE; both government agencies. This is the first time a technical evaluation of an approved EIA is being done in Nepal. This paper examines the outputs of EIA report, analyses technocratic problems and EIA usefulness, and suggests steps need to be focussed in next stage of a comprehensive EIA.

Data and information provided in the approved EIA report are analysed. Besides, published information on
