Elementary Algebra with Early Systems of Equations Tom Carson,Ellyn Gillespie,2005-02 Tom Carson engages students in the learning process by meeting them where they are and leading them to where they need to be through the determination of their individual learning style the development of study skills and the integration of learning strategies that help each student succeed Elementary Algebra with Early Systems of Equationsis a book for the student The authors goal is to help build students confidence their understanding and appreciation of math and their basic skills by presenting an extremely user friendly text that models a framework in which students can succeed

Unfortunately students who place into developmental math courses often struggle with math anxiety due to bad experiences in past math courses. Developmental math students often have never developed nor applied a study system in mathematics. To address these needs, the authors have framed three goals for Elementary Algebra: 1. reduce math anxiety, 2. teach for understanding, and 3. foster critical thinking and enthusiasm. The authors' writing style is extremely student friendly. They talk to students in their own language and walk them through the concepts, explaining not only how to do the math but also why it works and where it comes from, rather than using the "monkey see, monkey do" approach that some books take. Elementary Algebra with Early Systems of Equations, as the title implies, places the topic of Systems of Equations early in the text in Chapter 5. This organization is ideal for those instructors who prefer to teach systems of equations immediately following the chapter on graphing and the chapters prior to polynomials and factoring. For those who prefer to teach the topic later, Elementary Algebra by the same author team places Systems of Equations in Chapter 8. Foundations of Algebra: Solving Linear Equations and Inequalities, Problem Solving, Graphing Linear Equations and Inequalities, Systems of Equations, Polynomials, Factoring Rational Expressions and Equations, Roots and Radicals, Quadratic Equations. For all readers interested in elementary algebra.

Algebra for College Students Margaret L. Lial, E. John Hornsby, Terry McGinnis, 2008. The Lial series has helped thousands of readers succeed in developmental mathematics through its approachable writing style, relevant real-world examples, extensive exercise sets, and complete supplements package. Review of the Real Number System, Linear Equations, Inequalities, and Applications, Graphs of Linear Equations and Functions, Systems of Linear Equations, Exponents, Polynomials, and Polynomial Functions, Factoring Rational Expressions and Functions, Roots, Radicals, and Root Functions, Quadratic Equations and Inequalities, Additional Functions and Relations, Inverse Exponential and Logarithmic Functions, More on Polynomial and Rational Functions, Conic Sections, Further Topics in Algebra. For all readers interested in Algebra.

Intermediate Algebra (Hardcover) Marvin Bittinger, 2002-11. **College Algebra** Margaret L. Lial, John Hornsby, David I. Schneider, 2009. Over the years, the text has been shaped and adapted to meet the changing needs of both students and educators. As always, special care was taken to respond to the specific suggestions of users and reviewers through enhanced discussions, new and updated examples, and exercises. Helpful features and an extensive package of supplements and study aids. The result is an easy-to-use comprehensive text that is the best edition yet.
