Image Processing with ImageJ Jurjen Broeke, Jose Maria Mateos Perez, Javier Pascau, 2015-11-30 Extract and analyze data from complex images with ImageJ the world's leading image processing tool. About This Book Design automated image processing solutions and speed up image processing tasks with ImageJ. Create quality and intuitive interfaces for image processing by developing a basic framework for ImageJ plugins. Tackle even the most sophisticated datasets and complex images. Who This Book Is For The book has been created for engineers, scientists and developers eager to tackle image processing with one of the leading tools available. No prior knowledge of ImageJ is needed. Familiarity with Java programming will be required for readers to code their own routines using ImageJ. What You Will Learn Install and set up ImageJ for image processing. Process images using ImageJ's built in tools. Create macros to perform repetitive processing tasks. Set up and use an integrated development environment for ImageJ plugins. Create plugins with a user friendly interface for processing. Use established ImageJ plugins for processing and quantification. Generate a simple interface based on a real world example and create other interfaces for other projects. Speed up interface development by setting multiple parameters interactively. In Detail Advances in image processing have been vital for the scientific and technological communities making it possible to analyze images in greater detail than ever before. But as images become larger and more complex advanced processing techniques are required. ImageJ is built for the modern challenges of image processing it's one of the key tools in its development letting you automate basic tasks so you can focus on sophisticated in depth analysis. This book demonstrates how to put ImageJ into practice. It outlines its key features and demonstrates how to create your own image processing applications using macros and ImageJ plugins. Once you've got to grips with the basics of ImageJ you'll then discover how to build a number of different image processing solutions. From simple tasks to advanced and automated image processing you'll gain confidence with this innovative and powerful tool however and whatever you are using it for. Style and approach A step by step guide to image processing and developing macros and plugins in ImageJ. The book will progress from using the built in tools to macros and finally plugins for image processing. *Graphics and GUIs with MATLAB, Third Edition* O. Thomas Holland, Patrick Marchand, 2003 MATLAB now the industry standard engineering language for computation analysis and visualization continues to evolve in its capabilities. Version 6.x incorporated several major improvements including significant enhancements to its graphics features such as transparencies, increased 3-D visualization and an improved rendering engine. The bestselling *Graphics and GUIs with MATLAB* has been fully revised to reflect MATLAB version 6. The third edition also

features a number of improvements in both content and organization that ensure its readers get the optimum level of detail and best possible instruction New in the Third Edition Full updates that reflect MATLAB 6 x enhancements Expanded discussions on 2 D and 3 D graphics New chapters on good GUI design and data visualization techniques Volume visualizations Updated language commands Deeper coverage of programming techniques such as data structures and callback techniques Exercises in each chapter Additional examples and updated illustrations Graphics and GUIs with MATLAB Third Edition retains the comprehensible almost conversational tutorial style that made its predecessors so popular but offers a streamlined organization and deeper coverage that make this edition an even better way to acquire or increase proficiency in using MATLAB to its fullest graphics capabilities

MATLAB® and Design Recipes for Earth Sciences Martin H. Trauth, Elisabeth Sillmann, 2012-09-14 The overall aim of the book is to introduce students to the typical course followed by a data analysis project in earth sciences A project usually involves searching relevant literature reviewing and ranking published books and journal articles extracting relevant information from the literature in the form of text data or graphs searching and processing the relevant original data using MATLAB and compiling and presenting the results as posters abstracts and oral presentations using graphics design software The text of this book includes numerous examples on the use of internet resources on the visualization of data with MATLAB and on preparing scientific presentations As with its sister book MATLAB Recipes for Earth Sciences 3rd Edition 2010 which demonstrates the use of statistical and numerical methods on earth science data this book uses state of the art software packages including MATLAB and the Adobe Creative Suite to process and present geoscientific information collected during the course of an earth science project The book s supplementary electronic material available online through the publisher s website includes color versions of all figures recipes with all the MATLAB commands featured in the book the example data exported MATLAB graphics and screenshots of the most important steps involved in processing the graphics
