Higher Education in Austerity Europe Jon Nixon,2017-09-21 The financial crisis of 2007 2008 prompted governments across Europe to adopt austerity measures aimed at the reduction of their escalating budget deficits Higher Education in Austerity Europe explores how the resulting cuts in public expenditure together with the increasing reliance on the privatisation of services have impacted on higher education directly through the reduction of public sector provision and indirectly as a result of the social and political consequences of that reduction Moreover it explores how the effects of these economic policies have differed markedly across the national regions of Europe with the result that inequality has increased significantly both within and between national regions and this in turn has led to social and political dislocation within and across communities It is only by viewing higher education within this broader context that we can begin to understand the full implications of the austerity measures introduced over the last ten years Jon Nixon draws together leading scholars to delve into the complexity of impact and response generated by these measures Part 1 focuses on cross European perspectives Part 2 on the impact of austerity measures within national systems and Part 3 on new perspectives and possibilities The volume also includes considered responses from outsiders by academics located in Asia Australia and the USA providing an additional dimension to the analysis As well as analysing the

full impact of austerity measures across some of the worst hit national regions of Europe the contributors also identifying openings and possibilities for renewal **Machines that Think** New Scientist,2017-11-14 How did artificial intelligence become the most powerful technology on the planet Sometime in the future the intelligence of machines will exceed that of human brain power So are we on the edge of an AI pocalypse with superintelligent devices superseding humanity as predicted by Stephen Hawking Or will this herald a kind of Utopia with machines doing a far better job at complex tasks than us You might not realize it but you interact with AIs every day They route your phone calls approve your credit card transactions and help your doctor interpret results Driverless cars will soon be on the roads with a decision making computer in charge But how do machines actually think and learn In Machines That Think AI experts and New Scientist explore how artificial intelligence helps us understand human intelligence machines that compose music and write stories and ask if AI is really a threat
