### 3. Microstructure After Quench

To mount the gage on another instrument or a fixture, clamp the 4-8 stem or 4-15 stem. It is recommended to use a slotted holder or a split bushing for the mount structure.

**Abstract**

- **Absolutely avoid** pressing the stem directly with self screws.  
(The built-in bearing may be damaged.)
- **Avoid** that excessively tightening the stem, can cause trouble in the spindle operation.
- **Never** fix a screw into the stem.
- **Mount** the gages ring so the spindle is directed perpendicular to the measured surface. If the gage is mounted at an angle to the measured surface, an error may be generated in measurement results.
- **Describe** shape, size and fix exact a trace on the work through the cable.

### 3. Precautions in Protecting the Gase from Dust and Water

**DISCUSSION**

- The output connector (gauge and preamplifier [counter-pole]) is not protective structured. Install the gauge at a place where it is not splashed directly with water or oil.
- If an extension-cable is used, completely cover the preamplifier and connector area with a seal to be not be exposed to environments.
- If the cable covering is broken, liquid will penetrate into the gauge inside due to capillary phenomenon. This will cause damage to the gauge. Immediately repair the cable.
- Be greatly careful not to damage the rubber boot due to chips, etc. If the rubber boot is damaged, dust-proof function will be deteriorated. Immediately replace or repair the rubber boot.
- The materials including rubber which are used for the rubber boot and other sealing parts are not universal against acids and chemicals. If those parts deteriorate unusually, consult the nearest Mitsuboshi Service Center.
- If linear gauges are used in adverse environments where they are subject to frequent splashes of water and oil, it is recommended to take preventive measures such as replacing them before being damaged.
- If the output cable is damaged, the gauge will not be repaired. If the output cable is damaged, the part is discarded for the reason performance will not be guaranteed. Do not misidentify it as a consumable (the proper name is "output cable").

#### 4. Connecting the Gate to a Counter

Connect the output connector of the gage to the input connector on a linear gage counter. For detailed information, refer to the user's manual of the linear gage counter.

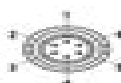

## DISCUSSION

- If the gage cable is close to the power line for other instruments, the gage may malfunction. Connect the gage cable apart from the power line as possible.
- If the gage is connected with other counter than 5000Hz mode, slow at least 0.2 second after the gage is turned on. Also, reset the counter.
