## Etude Sur Samuel:

### **The French Invention of Menopause and the Medicalisation of Women's Ageing** Alison M. Downham

Moore, 2022-10-06 Doctors writing about menopause in France vastly outnumbered those in other cultures throughout the entire nineteenth century. The concept of menopause was invented by French male medical students in the aftermath of the French Revolution becoming an important pedagogic topic and a common theme of doctors' professional identities in postrevolutionary biomedicine. Older women were identified as an important patient cohort for the expanding medicalisation of French society and were advised to entrust themselves to the hygienic care of doctors in managing the whole era of life from around and after the final cessation of menses. However, menopause owed much of its conceptual weight to earlier themes of women as the sicker sex, of vitalist crisis of the vapours and of astrological climacteric years. This is the first comprehensive study of the origins of the medical concept of menopause, richly contextualising its role in nineteenth-century French medicine and revealing the complex threads of meaning that informed its invention. It tells a complex story of how women's ageing featured in the demographic revolution in modern science, in the denigration of folk medicine, in the unique French field of hygiene and in the fixation on women in the emergence of modern psychiatry. It reveals the nineteenth-century French origins of the still current medical and alternative health approaches to women's ageing as something to be managed through gynaecological surgery, hormonal replacement and lifestyle intervention. In Samuel's Image Mayke De Jong, 1996. This study is about the multitude of early medieval children donated to God in the monastery. It puts child oblation in the context of contemporary gift-giving practices, providing in-depth treatment of the oblation ritual and its social setting.

Critique of Beckett Criticism Peter John Murphy, 1994. A survey of Beckett criticism in English, French and German.

Samuel Beckett (1906–1989) is an important figure in 20th-century literary history; his plays such as *Waiting for Godot* and *Endgame* have acquired a world-wide reputation, and his novels have proved important touchstones for the critical debates in contemporary literary theory. Born in Dublin, Beckett spent most of his writing life in France and wrote equally well in French and English; his German was also fluent, allowing him to direct his own plays in German theatres. Any attempt to deal with Beckett must therefore consider the critical response his works have provoked in all three languages. *A Critique of Beckett Criticism* is the first attempt in book form to give a comprehensive survey of the history and scope of Beckett criticism in French, English and German. Three parallel chapters examine the three major strands of Beckett criticism, retracing its development using a historical perspective and pointing out different trends, currents and fashions in opinion. Directions for further research are also suggested. P. J. MURPHY is a lecturer in contemporary British literature at the University College of the Cariboo, British Columbia. **A History of Complex Dynamics** Daniel S. Alexander, 2013-06-29 In late 1917 Pierre Fatou and Gaston Julia each announced several results regarding the iteration of rational functions of a single complex variable in the Comptes rendus of the French Academy of Sciences These brief notes were the tip of an iceberg In 1918 Julia published a long and fascinating treatise on the subject which was followed in 1919 by an equally remarkable study the first installment of a three part memoir by Fatou Together these works form the bedrock of the contemporary study of complex dynamics This book had its genesis in a question put to me by Paul Blanchard Why did Fatou and Julia decide to study iteration As it turns out there is a very simple answer In 1915 the French Academy of Sciences announced that it would award its 1918 Grand Prix des Sciences mathématiques for the study of iteration However like many simple answers this one doesn't get at the whole truth and in fact leaves us with another equally interesting question Why did the Academy offer such a prize This study attempts to answer that last question and the answer I found was not the obvious one that came to mind namely that the Academy's interest in iteration was prompted by Henri Poincaré's use of iteration in his studies of celestial mechanics
