Next Door Ethan C. Busby, Adam J. Howat, Jacob E. Rothschild, Richard M. Shafranek, 2021-09-29 In the United States politics has become tribal and personalized The influence of partisan divisions has extended beyond the political realm into everyday life affecting relationships and workplaces as well as the ballot box To help explain this trend we examine the stereotypes Americans have of ordinary Democrats and Republicans Using data from surveys experiments and Americans own words we explore the content of partisan stereotypes and find that they come in three main flavors parties as their own tribes coalitions of other tribes or vehicles for political issues These different stereotypes influence partisan conflict people who hold trait based stereotypes tend to display the highest levels of polarization while holding issue based stereotypes decreases polarization This finding suggests that reducing partisan conflict does not require downplaying partisan divisions but shifting the focus to political priorities rather than identity a turn to what we call responsible partisanship **Language and**

The Palgrave Handbook of Biology and Society Maurizio Meloni, John Cromby, Des Fitzgerald, Stephanie Lloyd, 2017-10-27. This comprehensive handbook synthesizes the often fractured relationship between the study of biology and the study of society. The six sections cover topics ranging from genomics and epigenetics to neuroscience and psychology to social epidemiology and medicine. The authors collaboratively present state of the art research and perspectives in some of the most intriguing areas of what can be called biosocial and biocultural approaches, demonstrating how quickly we are moving beyond the acrimonious debates that characterized the border between biology and society for most of the twentieth century. This landmark volume will be an extremely valuable resource for scholars and practitioners in all areas of the social and biological sciences. person Rapprochement Between Fathers and Sons Louis Rothschild, 2023-11-23 Following Freud's rather cold conception of fathers and a relative neglect of their role in psychoanalytic theory is a challenge to continue more recent efforts to develop a psychoanalytically affirmative portrait of fatherhood. Here fathers are attuned to relational mutuality and intimacy as a source of flourishing. Rapprochement is understood as a sub phase of child development marked by a dramatic expression of conflict such as "Hear me see me give me space don't give me space." In addition, rapprochement is considered to characterize conflicts between autonomy and dependency across the lifespan. An often muted and subtle tension between holding and letting go persists. Working with what is felt entails entering a never fully completed negotiation marked by misreadings, bias, and illusion. Father is understood to be a name pointing to a parenting function. With material that includes the grief of failed reunion, particular stories are mediated through thinking alongside philosophy and psychoanalytic theory in order to further explore the difficulty of integrating nurturing capacities into conceptions of masculinity. As a critique of gendered rigidity, a case is made for a social surround that declares mutual vulnerability to exist in a state of permanent inquiry and relational curiosity. Such openness can function to aid parents, clinicians, and respective community members to privilege the development of increased frustration tolerance. By extension, a good enough father is one who recognizes breakdown, a need for refueling, and possesses and practices a willingness to encounter uneven rhythms in human dimensions. This thoughtful work brings fresh insight into the role of the father and masculinity and is essential reading for mental health professionals.

This unique text elucidates the relationship between global nursing and global health, underscoring the significance of nurses' contributions in furthering the Post 2015 Agenda of the United Nations regarding global health infrastructures and examining myriad opportunities for nurses to promote the 17 Sustainable Development Goals (SDGs) and foster health and healthy environments worldwide. It is based on recent and emerging developments in the transnational nursing community and establishes, through the writings of esteemed global health and nursing scholars, a holistic dialogue about opportunities for nurses to expand their roles as change agents and leaders in the cross-cultural and global context.
