Conceptually the mechanism of stock market is very simple. People who are exposed to the same risk come together and agree that if anyone of the person suffers loss the other will share the loss & make good to the person who lost.

The initial part of the project focuses on the job & responsibilities. I was allotted as a summer trainee. It also makes the readers aware about the techniques & methodology used to bring this report alive.

There is growing competition between brokerage firms in post reform India. For investor it is always difficult to decide which brokerage firm to choose. Research was carried out to find which brokerage house people prefer and to figure out what people prefer while investing in stock market.

This study suggests the overall process of sales at Sharekhan Ltd., from the scratch i.e. from telecalling to fixing appointments with the client, from which a rigid analysis was carried out.

In the broking firm the client and the client database is the asset of the company, the management of such an asset is very important. The client database keeps on growing if it is well managed, on addition of the new clients we should not compromise with the service of the old clients. By this project we came to know how the database is managed in the company.
