The Partisan Next Door Ethan C. Busby, Adam J. Howat, Jacob E. Rothschild, Richard M. Shafranek, 2021-09-29 In the United States politics has become tribal and personalized The influence of partisan divisions has extended beyond the political realm into everyday life affecting relationships and workplaces as well as the ballot box To help explain this trend we examine the stereotypes Americans have of ordinary Democrats and Republicans Using data from surveys experiments and Americans own words we explore the content of partisan stereotypes and find that they come in three main flavors parties as their own tribes coalitions of other tribes or vehicles for political issues These different stereotypes influence partisan conflict people who hold trait based stereotypes tend to display the highest levels of polarization while holding issue based stereotypes decreases polarization This finding suggests that reducing partisan conflict does not require downplaying partisan divisions but shifting the focus to political priorities rather than identity a turn to what we call responsible partisanship

Indigenous Intergenerational Resilience Lewis Williams, 2021-11-04. This book argues that there is a need to develop greater indigenous-led intergenerational resilience in order to meet the challenges posed by contemporary crises of climate change, cultural clashes, and adversity. In today's media, the climate crisis is kept largely separate and distinct from the violent cultural clashes unfolding on the grounds of religion and migration, but each is similarly symptomatic of the erasure of the human connection to place and the accompanying tensions between generations and cultures. This book argues that both forms of crisis are intimately related, underscored and driven by the structures of white supremacy, which at their most immediate and visible manifest as the discipline of black bodies, and at more fundamental and far-reaching proportions are about the power, privilege, and patterns of thinking associated with, but no longer exclusive to, white people. In the face of such crisis, it is essential to bring the experience and wisdom of Elders and traditional knowledge keepers together with the contemporary realities and vision of youth. This book's inclusive and critical perspective on indigenous-led intergenerational resilience will be valuable to indigenous and non-indigenous interdisciplinary scholars working on human ecological resilience.

Handbook of Ethnography in Healthcare Research Paul Hackett, Christopher Hayre, 2020-12-02. This handbook provides an up-to-date reference point for ethnography in healthcare research. Taking a multi-disciplinary approach, the chapters offer a holistic view of ethnography within medical contexts. This edited volume is organized around major methodological themes such as ethics, interviews, narrative analysis, and mixed methods. Through the use of case studies, it illustrates how methodological considerations for ethnographic healthcare research are distinct from those in other fields. It has detailed content on the methodological facets of undertaking ethnography for prospective researchers to help them to conduct research in both an ethical and safe manner. It also

highlights important issues such as the role of the researcher as the key research instrument exploring how one's social behaviours enable the researcher to get closer to his/her participants and thus uncover original phenomena. Furthermore, it invites critical discussion of applied methodological strategies within the global academic community by pushing forward the use of ethnography to enhance the body of knowledge in the field. The book offers an original guide for advanced students, prospective ethnographers and healthcare professionals aiming to utilize this methodological approach.

Against Individualism Henry Rosemont Jr., 2015-03-25. The first part of *Against Individualism: A Confucian Rethinking of the Foundations of Morality, Politics, Family, and Religion* is devoted to showing how and why the vision of human beings as free, independent and autonomous individuals is and always was a mirage that has served liberatory functions in the past but has now become pernicious for even thinking clearly about much less achieving social and economic justice, maintaining democracy or addressing the manifold environmental and other problems facing the world today. In the second and larger part of the book, Rosemont proffers a different vision of being human gleaned from the texts of classical Confucianism, namely that we are first and foremost interrelated and thus interdependent persons whose uniqueness lies in the multiplicity of roles we each live throughout our lives. This leads to an ethics based on those mutual roles in sharp contrast to individualist moralities but which nevertheless reflect the facts of our everyday lives very well. The book concludes by exploring briefly a number of implications of this vision for thinking differently about politics, family, life, justice and the development of a human-centered, authentic religiousness. This book will be of value to all students and scholars of philosophy, political theory and Religious Chinese and Family Studies as well as everyone interested in the intersection of morality with their everyday and public lives.
