Explain Clearly The Similties And Diff:

Similarity in Difference Christer Lundh, Satomi Kurosu, 2014-12-05 A study of marriage in preindustrial Europe and Asia that goes beyond the Malthusian East West dichotomy to find variation within regions and commonality across regions Since Malthus an East West dichotomy has been used to characterize marriage behavior in Asia and Europe Marriages in Asia were said to be early and universal in Europe late and non universal In Europe marriages were supposed to be the result of individual choices but in Asia decided by families and communities This book challenges this binary taxonomy of marriage patterns and family systems Drawing on richer and more nuanced data the authors compare the interpretations based on aggregate demographic patterns with studies of individual actions in local populations Doing so they are able to analyze simultaneously the influence on marriage decisions of individual demographic features socioeconomic status and composition of the household and local conditions and the interactions of these variables They find differences between East and West but also variation within regions and commonality across regions The book studies local populations in Sweden Belgium Italy Japan and China Rather than a simple comparison of aggregate marriage patterns it examines marriage outcomes and determinants of local populations in different countries using similar data and methods The authors first present the results of comparative analyses of first marriage and remarriage and then offer chapters each of which is devoted to the results from a specific country Similarity in Difference is the third in a prizewinning series on the demographic history of Eurasia following *Life under Pressure* 2004 and *Prudence and Pressure* 2009 both published by the MIT Press *From Difference to Disadvantage* Áine Cregan, 2008

Socratic Puzzles Robert Nozick, 1997 One of the foremost philosophers of our

time Robert Nozick continues the Socratic tradition of investigation This volume which illustrates the originality force and scope of his work also displays Nozick s trademark blending of extraordinary analytical rigor with intellectual playfulness As such Socratic Puzzles testifies to the great pleasure that both doing and reading philosophy can be Comprising essays and philosophical fictions classics and new work the book ranges from Socrates to W V Quine from the implications of an Israeli kibbutz to the flawed arguments of Ayn Rand Nozick considers the figure of Socrates himself as well as the Socratic method why is it a method of getting at the truth Many of these essays bring classic methods to bear on new questions about choice How should you choose in a disconcerting situation Newcomb s Problem when your decisions are completely predictable Why do threats and not offers typically coerce our choices How do we make moral judgments when we realize that our moral principles have exceptions Other essays present new approaches to familiar intellectual puzzles from the stress on simplicity in scientific hypotheses to the tendency of intellectuals to oppose capitalism As up to date as the latest reflections on animal rights as perennial as the essentials of aesthetic merit doggerel by Isaac Newton goes to prove that changing our view of the world won t suffice as whimsical as a look at how some philosophical problems might appear from God s point of view these essays attest to the timeliness and timelessness of Nozick s thinking With a personal introduction in which Nozick discusses the origins tools and themes of his work Socratic Puzzles demonstrates how philosophy can constitute a way of life *What is the difference?* Frances Elizabeth G. Carey- Brock,1881 *Explaining Understanding* Stephen R. Grimm,Christoph Baumberger,Sabine Ammon,2016-10-04 What does it mean to understand something What types of understanding can be distinguished Is understanding always provided by explanations And how is it related to knowledge Such questions have attracted considerable interest in epistemology recently These discussions however have not yet engaged insights about explanations and theories developed in philosophy of science Conversely philosophers of science have debated the nature of explanations and theories while dismissing understanding as a psychological by product In this book epistemologists and philosophers of science together address basic questions about the nature of understanding providing a new overview of the field False theories cognitive bias transparency coherency and other important issues are discussed Its 15 original chapters are essential reading for researchers and graduate students interested in the current debates about understanding

Writing and Difference Jacques Derrida,1978 First published in 1967 Writing and Difference a collection of Jacques Derrida s essays written between 1959 and 1966 has become a landmark of contemporary French thought In it we find Derrida at work on his systematic deconstruction of Western metaphysics The book s first half which includes the celebrated essay on Descartes and Foucault shows the development of Derrida s method of deconstruction In these essays Derrida demonstrates the traditional nature of some purportedly nontraditional currents of modern thought one of his main targets being the way in which structuralism unwittingly repeats metaphysical concepts in its use of linguistic models The second half of the book contains some of Derrida s most compelling analyses of why and how metaphysical thinking must exclude

writing from its conception of language finally showing metaphysics to be constituted by this exclusion These essays on Artaud Freud Bataille Hegel and L vi Strauss have served as introductions to Derrida s notions of writing and difference the untranslatable formulation of a nonmetaphysical concept that does not exclude writing for almost a generation of students of literature philosophy and psychoanalysis Writing and Difference reveals the unacknowledged program that makes thought itself possible In analyzing the contradictions inherent in this program Derrida goes on to develop new ways of thinking reading and writing new ways based on the most complete and rigorous understanding of the old ways Scholars and students from all disciplines will find Writing and Difference an excellent introduction to perhaps the most challenging of contemporary French thinkers challenging because Derrida questions thought as we know it

Beyond Oneness and Difference Brook Ziporyn, 2013-11-01 Continues the author's inquiry into the development of the Chinese philosophical concept Li concluding in Song and Ming dynasty Neo Confucianism Beyond Oneness and Difference considers the development of one of the key concepts of Chinese intellectual history Li A grasp of the strange history of this term and its seemingly conflicting implications as oneness and differentiation as the knowable and as what transcends knowledge as the good and as the transcendence of good and bad as order and as omnipresence raises questions about the most basic building blocks of our thinking This exploration began in the book's companion volume Ironies of Oneness and Difference which detailed how formative Confucian and Daoist thinkers approached and demarcated concepts of coherence order and value identifying both ironic and non ironic trends in the elaboration of these core ideas In the present volume Brook Ziporyn goes on to examine the implications of Li as they develop

indifference for the purposes of domination which ultimately crystallizes in what he terms mis difference a calcified difficult to overcome obstacle to concord and fairness that underpins capitalist relations of property and production At the same time Ioris shows how some social actors use the concept of difference for reconciliation for overcoming indifference and mis difference and suggests how these moves can help to fight against ideologies that produce our unequal world and facilitate land grabs Ioris elucidates all of this in concrete terms through a study of the Guarani Kaiowa people in Brazil of how they have been oppressed by state sanctioned indifference and misdifference and of how they are resisting through a contestation of what difference can mean and how it can function in the contemporary world *Boxology* Irving H.
