creation or enhancement of natural processes in man made ecosystems such as cities Recent interest in NbS has emphasized their importance for urban water management and cities across the world have begun to experiment with them Experiences from different contexts however are not adequately captured and understood This book aims to address this gap by compiling case studies and reviews that explore NbS for urban water management from different regions and perspectives and highlight emerging challenges and opportunities for harnessing their potential Geographical Thought Lalita

Rana,2014-01-01 Geographical thought at any point in time is a manifestation of the prevailing viewpoints and methodological approaches in vogue The development of geography has a history of evolution of over 2000 years The discipline has been crafted over time to incorporate ideas from various schools of thought and several other disciplines from ancient to modern times The existing methodology and the subject matter of Geography is a reflection of this assemblage and evolution The nature of development remained more philosophical up to modern period The First edition of this book published in 2008 was an attempt towards compilation of relevant study material on evolution of Geographic thought in a systematic way up to the modern period The book has been revised with the addition of two elaborated sections i e one each on the Classical and the Contemporary tradition in geography However the major thrust of present book is on the nature of geographic developments in its contemporary phase More recently the anthropocentrism and a concern about methodology are more evident in the development of discipline *Nature and Identity in Cross-Cultural Perspective* A.

Buttimer,L. Wallin,2013-04-17 *Nature and Identity in Cross Cultural Perspective* presents 20 essays which explore diverse cultural interpretations of the earth s surface Contrasted with each other and with the potentially cosmopolitan culture of science these detailed studies of ways in which different cultures conceptualise nature appear in the context of global environmental change Understanding across cultural lines has never been more important This book shows how individual cultures see their own histories as offering protection for nature while often viewing others as lacking such ethical restraints Through such writing a discourse of understanding and common action becomes possible The authors come from the places they discuss and offer passionate as well as scholarly visions of nature within their cultural homes Audience This volume is of interest to academics and professionals working in the fields of cultural geography environmental history environmental studies history of environmental ideas environmental education landscape and literature nature and culture It can be used for courses in the above mentioned areas and seminars in comparative literature It can also be used as a complimentary text to provide cultural context to literary readings and for seminars on cultural aspects of the environment **Human**

Geography Erin Hogan Fouberg,Alexander B. Murphy,Harm J. De Blij,2015 **Interdisciplinary Environmental Solutions** Barnali Dixon,2025-07-02 This textbook presents a clear and accessible argument for sustainable planning and development The book discusses multiple environmental issues and examines how potential solutions can and should be addressed in the context of space and place The book also offers an invaluable discussion on the need for a framework for

system based thinking where various disciplines should work together to find innovative solutions Students are provided with an appreciation of the need for an interdisciplinary approach to these issues combined with an underlying sense of space an appreciation of cultural diversity and differences as well as associated insights into human relationships These core attributes put space at the heart of environmental and natural resources management in terms of policy planning and on the ground initiatives This book will be an invaluable reference for advanced undergraduate graduate students and researchers working in the field looking for an accessible overview of this interdisciplinary approach to the topic **The SAGE**
