Meaning in the Second Language Roumyana Slabakova, 2008-12-10 This book reviews recent research on the second language acquisition of meaning with a view of establishing whether there is a critical period for the acquisition of compositional semantics A modular approach to language architecture is assumed The book addresses the Critical Period Hypothesis by examining the positive side of language development it demonstrates which modules of the grammar are easy to acquire and are not subject to age effects The Bottleneck Hypothesis is proposed which argues that inflectional morphology and its features present the most formidable challenge while syntax and phrasal semantics pose less difficulty to learners Findings from the neurofunctional imaging PET fMRI and electrophysiology ERPs of L2 comprehension are reviewed and critically examined Since it is argued that experimental tasks in those studies are mostly in need of linguistic refinement evidence from behavioral studies of L2 acquisition of semantics are brought to bear on comprehension modeling Learning situations are divided into two types those presenting learners with complex syntax but simple semantics and those offering complex semantic mismatches in simple syntactic contexts The numerous studies of both types reviewed in the book indicate that there is no barrier to ultimate success in the acquisition of phrasal semantics

The Play World Patricia Anne Simpson, 2020-09-21 The Play World chronicles the history and evolution of the concept of play as a universal part of childhood Examining texts and toys coming out of Europe between 1631 and 1914 Patricia Anne Simpson argues that German material literary and pedagogical cultures were central to the construction of the modern ideas and realities of play and childhood in the transatlantic world With attention to the details of toy manufacturing

and marketing Simpson considers prescriptive texts about how children should play treat their possessions and experience adventure in the scientific exploration of distant geographies She illuminates the role of toys among them a mechanical guillotine yo yos hybridized dolls and circus figures as agents of history Using an interdisciplinary approach that draws from postcolonial childhood and migration studies she makes the case that these texts and toys transfer the world of play into a space in which model childhoods are imagined and enacted as German With chapters on the Protestant play ethic enlightened parenting Goethe as an advocate of play colonial fantasies children s almanacs ethnographic play and an empire of toys Simpson s argument follows a compelling path toward understanding the reproduction of religious gendered ethnic racial national and imperial identities emanating from German speaking Europe that collectively construct a global imaginary This foundational and deeply original study connects German speaking communities across the Atlantic as they collectively engender the epistemology of the play world It will be of particular interest to German studies scholars whose research crosses the Atlantic
