,1956 **Language Variation □ European Perspectives** Frans L. Hinskens,2006-11-30 This volume presents 16 original studies of variation in languages representing the three main European language families as well as in varieties of Greek and Hungarian The studies concern variation in or across dialects or dialect groups in standard varieties or in emerging regional varieties of the standard Several studies investigate a specific linguistic element or structure while others focus on areas of tension between variation and prescriptive standard norms on regional standard varieties and regiolects on problems of

linguistic classification from folk linguistic or dialect geographical perspectives and the classification of speakers Language acquisition plays a main role in three studies The studies in this volume represent a range of methods including ethnographic and interpretative approaches conversation analysis analyses of the internal and geographical distribution of dialect features the classification and quantitative analyses of socio demographic speaker background data quantitative analyses of both diachronic and synchronic language data phonetic measurements as well as quasi experimental perception studies The volume thus offers a microcosmic reflection of the macrocosmos of world wide research on variability in originally European languages at the beginning of the 21th century and the linguistic expression of cultural diversity *Automated Essay Scoring* Mark D. Shermis, Jill C. Burstein, 2003-01-30 This new volume is the first to focus entirely on automated essay scoring and evaluation It is intended to provide a comprehensive overview of the evolution and state of the art of automated essay scoring and evaluation technology across several disciplines including education testing and measurement cognitive science computer science and computational linguistics The development of this technology has led to many questions and concerns Automated Essay Scoring attempts to address some of these questions including How can automated scoring and evaluation supplement classroom instruction How does the technology actually work Can it improve students writing How reliable is the technology How can these computing methods be used to develop evaluation tools What are the state of the art essay evaluation technologies and automated scoring systems Divided into four parts the first part reviews the teaching of writing and how computers can contribute to it Part II analyzes actual automated essay scorers including e rater™ Intellimetric and the Intelligent Essay Assessor The third part analyzes related psychometric issues and the final part reviews innovations in the field This book is ideal for researchers and advanced students interested in automated essay scoring from the fields of testing and measurement education cognitive science language and computational linguistics
