An integral part of the past 50 years. 1962 2012 of this history has been Vector Journal of the British Columbia Association of Mathematics Teachers. This volume which presents ten memorable articles from each of the past five decades that is 50 articles from the past 50 years of the journal provides an opportunity to share this rich history with a wide range of individuals interested in the teaching and learning of mathematics and mathematics education. Each decade begins with an introduction providing a historical context and concludes with a commentary from a prominent member of the British Columbia mathematics education community. As a result this monograph provides a historical account as well as a contemporary view of many of the trends and issues in the teaching and learning of mathematics. This volume is meant to serve as a resource for a variety of individuals including teachers of mathematics mathematics teacher educators mathematics education researchers historians and undergraduate and graduate students. Most importantly this volume is a celebratory retrospective on the work of the British Columbia Association of Mathematics Teachers. Collaborating to Support All Learners in Mathematics and Science Faye Brownlie, Carole Fullerton, Leyton Schnellert, 2011-06-23 In this second volume of It's All About Thinking the authors focus their expertise on

the disciplines of mathematics and science translating principles into practices that help other educators with their students How can we help students develop the thinking skills they need to become successful learners How does this relate to deep learning of important concepts in mathematics and science How can we engage and support diverse learners in inclusive classrooms where they develop understanding and thinking skills In this book Faye Leyton and Carole explore these questions and offer classroom examples to help busy teachers develop communities where all students learn This book is written by three experienced educators who offer a welcoming and can do approach to the big ideas in math and science education today In this book you will find insightful ways to teach diverse learners Information circles open ended strategies inquiry manipulatives and models lessons crafted using curriculum design frameworks udl and backwards design assessment for as and of learning fully fleshed out lessons and lesson sequences inductive teaching to help students develop deep learning and thinking skills in Math and Science assessment tools and student samples for concepts drawn from learning outcomes in Math and Science curricula excellent examples of theory and practice made accessible real school examples of collaboration teachers working together to create better learning opportunities for their students **Teacher**

Acculturation Edward R. Howe, 2022-03-16 This book evolved from decades of transcultural experiences Edward Howe s comparative ethnographic narrative a blend of narrative inquiry and reflexive ethnography uniquely captures the essence of teacher acculturation Each chapter is filled with intriguing teachers stories based on lived experiences connected through the common thread of learning to teach Compelling teacher narratives spanning seven decades show that much of what teachers do is learned implicitly and is culturally embedded Teacher Acculturation provides a window into the world of novice teachers from the 1950s through present day The thought provoking stories provide a springboard for critical discussions about gender sexuality culture race ethnicity Indigenous perspectives SES class religion location space time and the challenges facing teachers in different contexts The author highlights the importance of teacher relationships built on mutual understanding trust mentorship leadership and guidance Beginning teachers are largely required to work in isolation to learn their practice through trial and error left to sink or swim There is little provision for mentorship and insufficient time to reflect on teaching practices Collaborative and reflective self study as illustrated in Teacher Acculturation shows great promise to ameliorate this pervasive problem in teacher induction Thus the book will appeal to teacher educators teachers and to anyone interested in the fascinating lives of teachers *Math plus Reading, Grades 5 - 6* American Education

Publishing, 2011-03-15 Each Summer Link Math Plus Reading workbook available in Kindergarten through Grade 6 prepares your child for the school year ahead The fun easy to use activities review and extend essential skills and increase confidence at school Each book includes test prep a skills checklist for parents a recommended summer reading list and an answer key Back cover **The Armageddon Factor** Marci McDonald, 2011-04-13 In her new book award winning journalist Marci

McDonald draws back the curtain on the mysterious world of the right wing Christian nationalist movement in Canada and its

many ties to the Conservative government of Stephen Harper To most Canadians the politics of the United States where fundamentalist Christians wield tremendous power and culture wars split the country seem too foreign to ever happen here But The Armageddon Factor shows that the Canadian Christian right infuriated by the legalization of same sex marriage and the increasing secularization of society has been steadily and stealthily building organizations alliances and contacts that have put them close to the levers of power and put the government of Canada in their debt Determined to outlaw homosexuality and abortion and to restore Canada to what they see as its divinely determined destiny to be a nation ruled by Christian laws and precepts this group of true believers has moved the country far closer to the American mix of politics and religion than most Canadians would ever believe McDonald s book explores how a web of evangelical far right Christians have built think tanks and foundations that play a prominent role in determining policy for the Conservative government of Canada She shows how Biblical belief has allowed Christians to put dozens of MPs in office and to build a power base across the country across cultures and even across religions What drives that growing Christian nationalist movement is its adherents conviction that the end times foretold in the book of Revelation are at hand writes McDonald Braced for an impending apocalypse they feel impelled to ensure that Canada assumes a unique scripturally ordained role in the final days before the Second Coming and little else The Armageddon Factor shows how the religious right s influence on the Harper government has led to hugely important but little known changes in everything from foreign policy and the makeup of the courts to funding for scientific research and social welfare programs like daycare And the book also shows that the religious influence is here to stay regardless of which party ends up in government For those who thought the religious right in Canada was confined to rural areas and the west this book is an eye opener outlining to what extent the corridors of power in Ottawa are now populated by true believers For anyone who assumed that the American religious right stopped at the border The Armageddon Factor explains how US money and evangelists have infiltrated Canadian politics This book should be essential reading for Canadians of every religious belief or political stripe Indeed The Armageddon Factor should persuade every Canadian that with the growth of such a movement the future direction of the country is at stake
