Grade 2014 November Test Memorandum Business:

The Report: Abu Dhabi 2014 Oxford Business Group, 2014-03-25 Although the emirate's economic growth can be primarily attributed to its vast hydrocarbons resources it has also made progress diversifying into new sectors such as manufacturing tourism aerospace defence finance and logistics In addition to its economic investments Abu Dhabi has also made major contributions to social welfare as well as infrastructure which has been identified as the bedrock for future growth The government has played a key role in the expansion of the security aerospace and defence industry over the past decade in an effort to strengthen the UAE's defence capabilities and as a means of boosting economic diversification Despite challenges such as a high level of regional competition most local defence and aviation firms expect to see continued expansion for years to come The evidence suggests that the emirate has succeeded in nurturing new economic sectors and is on track to meet its goals The oil and gas sector accounted for 56.5% of Abu Dhabi's GDP at current prices in 2012 followed by construction 9.6% manufacturing 5.9% and real estate 4.4%

The Airline Revolution Gordon Mills, 2016-07-15 When starting new airlines in response to government deregulation entrepreneurs in the U.S. and Europe reduced some traditional service qualities to reduce costs concentrated on non-stop services between city pairs not already so connected improved on time performance and offered low fares to win leisure travelers from the incumbents and to encourage more travel In recent developments some of the new airlines have offered optional extras at higher fares to attract business travelers and entered major routes alongside the legacy carriers Within both the U.S. and Europe deregulation removed most geographical barriers to expansion by short haul airlines Later limited deregulation spread to other world regions where many short haul routes connect city pairs in different countries and where governments have retained traditional two country mechanisms restricting who may fly To gain access to domestic routes in other countries some new airlines are setting up affiliate companies in neighboring countries with each company legally controlled in the country of domicile With air travel growing strongly especially in Asia a common result is intense but potentially short lived competition on major routes The recent developments give clear signposts to likely mid-term outcomes and make this an opportune time to report on the new airline scene The Airline Revolution will provide valuable economic analysis of this climate to students airline professionals advancing to senior positions public servants and others who provide advice to governments
