Grade 9 Science Astronomy:

Teaching and Learning Astronomy Jay Pasachoff, John Percy, 2005-12-15 Astronomy is taught in schools worldwide but few schoolteachers have any background in astronomy or astronomy teaching and available resources may be insufficient or non-existent. This volume highlights the many places for astronomy in the curriculum, relevant education research and best practice strategies for pre-service and in-service teacher education, the use of the Internet and other technologies and the role that planetariums, observatories, science centres and organisations of professional and amateur astronomers can play. The special needs of developing countries and other under-resourced areas are also highlighted. The book concludes by addressing how the teaching and learning of astronomy can be improved worldwide. This valuable overview is based on papers and posters presented by experts at a Special Session of the International Astronomical Union. Subject Offerings and Enrollments in Public Secondary Schools United States. Office of Education, Grace Stevens Wright, 1965

Resources in Education, 1999-10 Information Handling in Astronomy - Historical Vistas Andre Heck, 2006-04-18 This book is dedicated to the memory of Gisèle Mersch whose life ended prematurely in June 2002. Back in the 1970s when few people were using them, Gisèle introduced me to the arcane secrets of then advanced multivariate statistical methodologies. I was already involved in more classical statistical studies undertaken at Paris Observatory with Jean Jung, developing and applying maximum likelihood algorithms to stellar photometric and kinematic data in order to derive absolute luminosities, distances and velocities in the solar neighbourhood. But what could be envisaged with those methodologies was something of another dimension for the first time I could really see how to extract information from massive amounts of data without calling for elaborated physical or mechanical theories. Several pioneering applications were developed under Gisèle's guidance and with her collaboration to study the delicate interface between spectroscopic and photometric data. Thus errors in spectral classifications were investigated as well as predictions of spectral classifications from photometric indices (see Heck 1976, Heck et al 1977, Heck & Mersch 1980 and Mersch & Heck 1980 with very interesting results for the time). Gisèle also took part in studies of period determination algorithms (see Mersch & Heck 1981, Manfroid et al 1983 and Heck et al 1985).

Public High School Graduates who Participated in Vocational/technical Education, 1982-1998 Karen Levesque, 2003 Patterns and trends in the vocational/technical course taking of public high school graduates between 1982 and 1998 were examined in a study of high school transcripts for the graduating classes of 1982, 1990, 1992, 1994 and 1998. The source data came from the following five studies: 1. High School and Beyond Sophomore Cohort First Follow-up Survey; 2. High School Transcripts Study 1982; 3. National Education Longitudinal Study of 1988 Second Follow-up Survey; 4. High School Transcript Study 1992; and 5. High School Transcript Studies of 1990, 1994 and 1998. The analysis revealed differences in participation in vocational/technical education based on

the following variables race ethnicity sex disability status English proficiency academic achievement and school urbanicity and poverty level Generally graduates took fewer vocational courses between 1982 and 1998 although their occupational course taking was relatively steady Graduates with disabilities as of grade 12 took more vocational and occupational course work by the end of the period studied Asians and Pacific Islanders and high academic achievers did not exhibit the declines in vocational course taking that were observed for other groups Fifty four tables figures are included The bibliography lists 22 references Appendixes constituting approximately 80% of the document contain the following items 52 standard error tables a glossary and technical notes and a description of the study methodology MN
