Independence to the Present) KHRITISH SWARGIARY, 2024-07-01 India's journey in education particularly its examination
system has been a compelling narrative of transformation challenges and continuous evolution Since gaining independence
in 1947 India has navigated a complex path to develop an education system that meets the needs of a diverse and rapidly
growing population The examination system as a critical component of this journey reflects the broader socio economic
cultural and political changes that the country has undergone over the past seven decades This book India's Education

Examination System From Independence to the Present aims to provide a comprehensive examination of the evolution reforms and current practices within India's examination system. By delving into the historical context, key reforms and future directions, this book offers an in-depth understanding of how India has shaped its education policies to address the aspirations and challenges of its people. The examination system, often criticized for its rigidity and high-stakes nature, has seen numerous reforms aimed at making it more inclusive, equitable, and reflective of students' diverse talents and capabilities. From the early post-independence commissions such as the University Education Commission and the Secondary Education Commission to contemporary policies like the National Education Policy (NEP) 2020, each chapter of this book explores the milestones and turning points that have defined India's examination landscape. *What Ails Our Schools?* VIMALA

NANDAKUMAR, 2013-07 Though a large number of Indians have excelled academically, the world over, they constitute a minuscule fraction of Indians who have the potential to do equally well or better. This book introspects on the educational system in India. The author discusses the challenges faced by schools, teachers, and Principals. The responsibilities of the management and the parents are addressed. The challenges of overcrowded classrooms, lack of infrastructure, and absence of sensitive attention to students and dismissal of genuine complaints of students are discussed. People engaged in imparting school education are persuaded by the author to accord top priority to students' welfare in a sustained manner. The author narrates many anecdotes drawn from experience to illustrate the ailments afflicting our schools. The book is not merely a compilation of the challenges faced by our students, teachers, and Principals. Some possible solutions are also suggested. Children deserve the best education whatever be their social background. The focus of the book is on children and entirely on children. The book is dedicated to the student community, the future of our country. **Bulletin of the Atomic Scientists**
