

Bobbin winding

Removing the bobbin case

Open the door in front of the shuttle by means of the small recess on the left side.

Grip the bobbin case with the thumb and index finger so that the latch is depressed and pull the bobbin case out. The bobbin will remain in the case as long as the latch is depressed. When you release the latch, the bobbin will be released.

Bobbin winding

Turn the empty bobbin until the small round dot on one side is outward. Slide the bobbin onto the bobbin spindle, which is located on the right side of the machine.

Threading for bobbin winding can be done as illustrated in the upper picture. If you do not want to unthread the machine, raise the presser foot and thread the machine as illustrated in the lower picture. Do not draw the thread straight from the needle eye, otherwise the needle may get bent. Run the thread in the thread guide at the front of the machine. Start from underneath and wind the thread around the bobbin a few times. Hold the end of the thread while you press down the foot control. Release the thread end as soon as winding starts. The machine will stop automatically when the bobbin is full.
