Janet Thomson, MSC, 2012-03-05 Fed up with endless faddy diets that never deliver the results you want and leave you lunging for the chocolate with a guilty conscience It's time to stop punishing your body with crazy regimes in the hope that one day it will co operate and recognize that to lose weight and change your body you first have to change how you think Think More Eat Less will help you do just that providing a step by step plan to re programme your thoughts surrounding food It will also give you an understanding of how your hormones control your body weight and how you can learn to manage them using a unique food system to cleanse your body and burn fat allowing you to make physical and emotional transformations you never thought possible a total Mind Body makeover **What If?** Eldon Taylor, 2011-03-15 What if you awoke tomorrow with amnesia no memory of who you are what you like and dislike and so on Would you be the same person What if as in the movie The Matrix you discovered that everything was a simulation and you were just a programmed component What if everything you believed was false Who would you be then Eldon Taylor has been researching the power of the mind for more than 25 years He has repeatedly demonstrated the overt attempts that have been made to control your thinking While very interesting in theory most of us do not understand this on a personal level It is easy to understand the concept of Mind Programming when it is occurring with someone else but most would deny that they too are victims What If is a very personal book By using everyday situations and guiding you through numerous thought experiments Eldon does an excellent job of peeling back the layers and revealing the dissonance in much of your thinking beliefs desires and choices

**Readercentric Writing for Digital Media** David Hailey, 2016-12-05 This book presents an altogether new approach to writing and evaluating writing in digital media It suggests that usability theory provides few tools for evaluating content because usability theory assumes only one kind of writing on the Internet The author suggests three models user centric usability model persuasion centric encouraging the reader to linger and be persuaded Canon camera ads and quality centric encouraging the reader to linger and learn or be entertained because of the quality of the writing NASA gov and YouTube Designed for professional writers and writing students this text provides a rubric for writing in digital media but more importantly it provides a rubric and vocabulary for identifying and explaining problems in copy that already exists The Internet has become a pastiche of cut and paste content often placed by non writers to fill space for no particular reason or by computers with no oversight from humans e g Amazon com Because these snippets are typically on topic but often for the wrong purpose or audience professional writers have difficulty identifying the problems and an even harder time explaining them Finding an effective tool for identifying and explaining problems in digital content becomes a particularly important problem as writers increasingly struggle with growing complications in complex information systems systems that create and manage their own content with little human intervention Being able to look at a body of copy and immediately see that it is problematic is an important skill that is lacking in a surprising number of professional writers
